NEW *Sparkle* STRAWBERRY

An excellent, new, experimental station bred variety that lengthens the strawberry picking season for the home or market. Here is why Sparkle is making good.

- Rich, glossy red, smooth berries that actually sparkle.
- Sparkling berries topped with big green, fresh-looking caps.
- A really delicious ripe strawberry flavor — and fragrant aroma.
- Especially satisfactory for quick-freezing — keeps its color, shape and flavor.
- Vigorous-growing, disease-free, heavy bearing plant.
- A fine berry that comes late in the season.

Morrison **BLACK RASPBERRY**

Good black raspberries are wanted in every garden and on every market. Morrison is a better variety that ripens late and makes money. These bigger, brighter, black berries look "good" on your table or fruit market. Their fine flavor and high profits measure up to their fine appearance. Plant some this spring. See also Page 15.

Gorgeously Beautiful— **Tuberous Rooted Begonias**

Double, Camellia-like Flowers
Easy to Grow, Indoors and Out

Planted this spring these better bulbs of camellia-flowered Begonias will bloom this summer over a long season with a profusion of delicately colored, satiny, wax-like flowers. Especially adapted to shady places—in fact, prefer partial shade. Can be planted in pots for outdoor bloom in summer or indoors in winter. Also for outdoor mass planting. Perfect for shaded window boxes.

Ours are highest quality, selected bulbs to flower this summer. Four Fine Colors—PINK, RED, YELLOW, WHITE.

Red Lake Currant

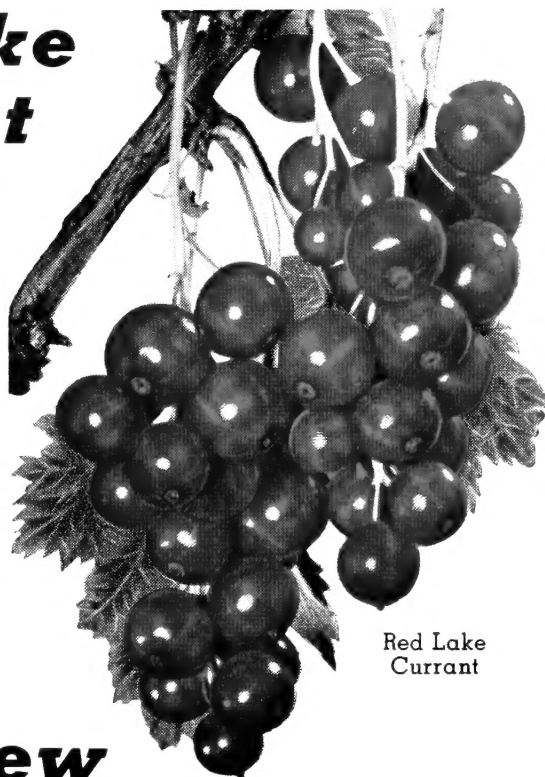

Larger Berries—Heavier Bearing

This tells why the New Red Lake is the finest of all red currants. It is taking the place of such good kinds as Wilder and Perfection. Big, bright red berries on long stems are easy to pick. Bushes are hardy, vigorous, very productive. A mid-season variety continuing over a long season, it is a profitable commercial sort.

On the table, what is better than rich red Currant Jelly? Red Lake's rich, delicious flavor makes fine jelly. With 3 to 6 bushes in your garden you will have plenty.

New Fairhaven Peach

**A Large, Firm, Dependable
Early Producer**

Fairhaven is a greatly improved heavy bearer of medium large fruit with high average annual production. Ripens early, between Redhaven and Halehaven. Trees are robust and will withstand winter injury. Fruit is nearly round, bright gold with attractive bright red cheek. Flesh is freestone, yellow and red at the pit. Exquisite flavor. It is a firm peach and a good early-season shipper. Originated, tested and introduced by the Michigan Agri. Expt. Station; a cross of J. H. Hale and South Haven. A valuable commercial variety in its season and a popular addition to every home orchard.

O. A. D. Baldwin

G. W. R. Baldwin

Dear Friends:

Again another year is here and with it our opportunity to say "Thank You" for your business and your interest in us. Your orders are truly appreciated and in return we want you to have the best there is in nursery stock.

When you order your nursery stock you want to know that you will receive good plants and trees that will grow satisfactorily for you. There are many nurseries and the great majority have good stock, but your satisfaction depends on the digging, packing and shipping of that stock. Here at our place we have taken a special pride in giving each order individual care so that our customers would have the best. The fact that so many from all parts of the country have been with us for many years, shows that they have always been well satisfied.

In this 1950 catalog there is an even wider and more up-to-date selection than last year—fruit plants of all kinds, fruit trees—both standard and dwarf, popular nut trees, better roses, choice shrubs and lovely perennials. From this book you can select all the different things you want and have them come all at one time, convenient for your planting.

Please feel free to write us and do not forget we are here to be of service.

Sincerely yours,

O. A. D. BALDWIN NURSERY

P. S. Throughout the catalog we have made several special selections. They are varieties especially good for home gardens, and at special low prices. They can help you select complete plantings.

WHY IT PAYS To Buy Nursery Stock from a Grower

When you buy by mail direct from the nursery you are dealing with the grower. He best knows how to grow, dig, pack and ship. This means you will get no storage or store-held stock, and that your order will be shipped quickly and will reach you in the finest possible planting condition. All this is most important to you because you want only stock that is most sure to give entire satisfaction and bring you the fruit, flowers and beauty that you expect from your planting. Your satisfaction with such stock is bound to be greater.

In City or Country Plant Fruit Trees for Shade, Blossoms, and Fruit

More home owners are putting fruit trees into their plantings of shrubs and flowers. Fruit trees make good shade trees, and there is no finer sight than fruit trees in full bloom in spring or filled with ripe fruit in summer and fall. They are equally well suited for planting in the city lot or farm home.

Farm Homes—are up-to-date with new plantings of shrubs, roses and perennial flowers—and fruit trees in the yard and home orchard.

PLEASE NOTE

Read "Instructions for Ordering" on back of order blank. They save time and avoid errors. All prices F.O.B. Bridgman, Michigan, and all transportation charges are to be paid by the customer (except where noted).

CASH DISCOUNTS FOR EARLY ORDERS 10%

on Orders Sent By Feb. 5

These discounts apply to all prices in the catalog except special collections and where otherwise noted, or special prices quoted by letter. Cash in full must be sent with order.

**Add Extra Stock for the
Amount of Discount
If You Prefer**

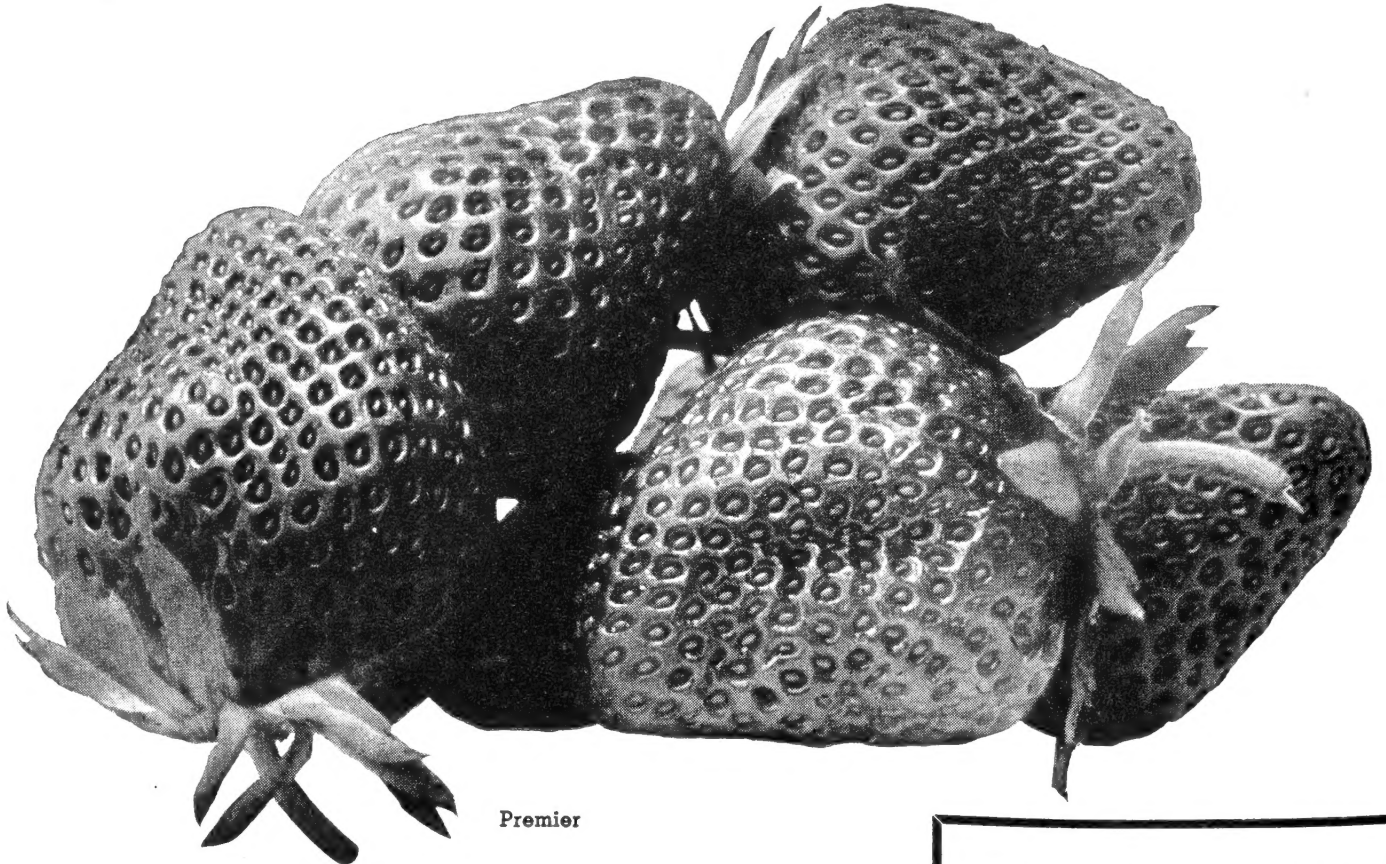

BALDWIN'S GUARANTEE

For 61 years the Baldwins have backed up this guarantee to the entire satisfaction of their thousands of customers everywhere. We guarantee every plant, tree, shrub or bulb sold by us to be first class, to be free from injurious disease or insects, to be in good growing condition on arrival at destination when shipped by express or mail, and will, at our option, either replace free of charge or refund the purchase price paid of any that is not, when we are notified within five days of receipt of stock. We further guarantee our nursery stock to be true-to-name and will, on proper proof, at our option, either replace free of charge or refund the purchase price paid of any stock that proves untrue to name. We are, in any case, not liable for more than the purchase price of stock ordered.

All contracts and agreements are made subject to flood, drought, fire, frost, crop failure, or other causes beyond our control. Our Michigan Certificate of Nursery Inspection is attached to every shipment.

THANK YOU FOR A MINUTE OF YOUR TIME—Do you have neighbors or friends who you know are going to plant nursery stock this spring? If you do, kindly write their names and addresses on the back of the order blank and we will send them one of our catalogs.

Superior Strawberry Plants

Premier

Premier

The Great Commercial Strawberry

PREMIER is one of the most profitable strawberry varieties grown today. It puts a big crop of fine appearing berries on the market first every time and does it in spite of frosts that often kill other varieties. These two facts are PREMIER'S greatest points of superiority as a dependable money-maker. PREMIER eliminates crop failures, and by ripening five days to a week earlier than any other kind, it never fails to command high prices. Always produces its good crops on a wide range of soils and climates throughout the country.

Actually millions more Premier plants have been sold the past few years than any other kind. Premier continues to be widely planted in larger quantities than any other early berry. Growers know that PREMIER is an unfailing money-

maker every year. Consumers demand it. You will need to grow PREMIER—and plenty of them—to be in the berry business profitably.

WHY PREMIER IS BETTER

1. First to ripen.
2. Remarkably frost resistant.
3. Long fruiting season.
4. Unusually large crops.
5. Size above average.
6. Bright, glossy, solid color.
7. Uniform, attractive shape.
8. Firm berry, excellent shipper.
9. Buyers pay a big premium for Premier.

EARLIEST OF ALL— FROST PROOF

If you want to make more money, plant Premier this spring!

Order at once so we can reserve yours. Our plants are guaranteed true-to-name, healthy and vigorous. You can depend on them to make money.

**This Valuable
Planting Guide
FREE!**

To every customer who sends us an order of \$1.50 or more by May 1st, 1950, we will send this Planting Guide FREE. This 20-page "How to Plant" booklet is packed with practical information on planting, pruning, fertilizing, spraying and general care of most every kind of nursery stock. It tells the story in pictures—you cannot go wrong. Regular price: 10c.

Your Assurance of First-Class Healthy Nursery Stock

Berrien County, Michigan, where our nursery is located, is especially favored by its good soil and climate here along Lake Michigan for growing nursery stock that has exceptionally strong root systems and vigorous hardy plants and trees. Then our efficient Michigan Nursery Inspection Service goes further and makes certain that every item you get from us is free from injurious diseases and insects. You cannot help getting a good start with such nursery stock.

Michigan Certificate of Nursery Inspection

Michigan State Department of Agriculture
Certificate of Nursery
Inspection No. 936

This is to certify that the Nursery Stock of O. A. D. Baldwin Nursery, Bridgman, Michigan, has been examined and found to be apparently free from dangerous insects and dangerous contagious tree and plant diseases. CHAS. FIGY, Commissioner. This certificate to be void after September 15, 1950. C. A. BOYER, Director, Bureau of Plant Industry, Lansing, Mich. August 22, 1949.

Senator Dunlap

The Old Reliable Money-Maker

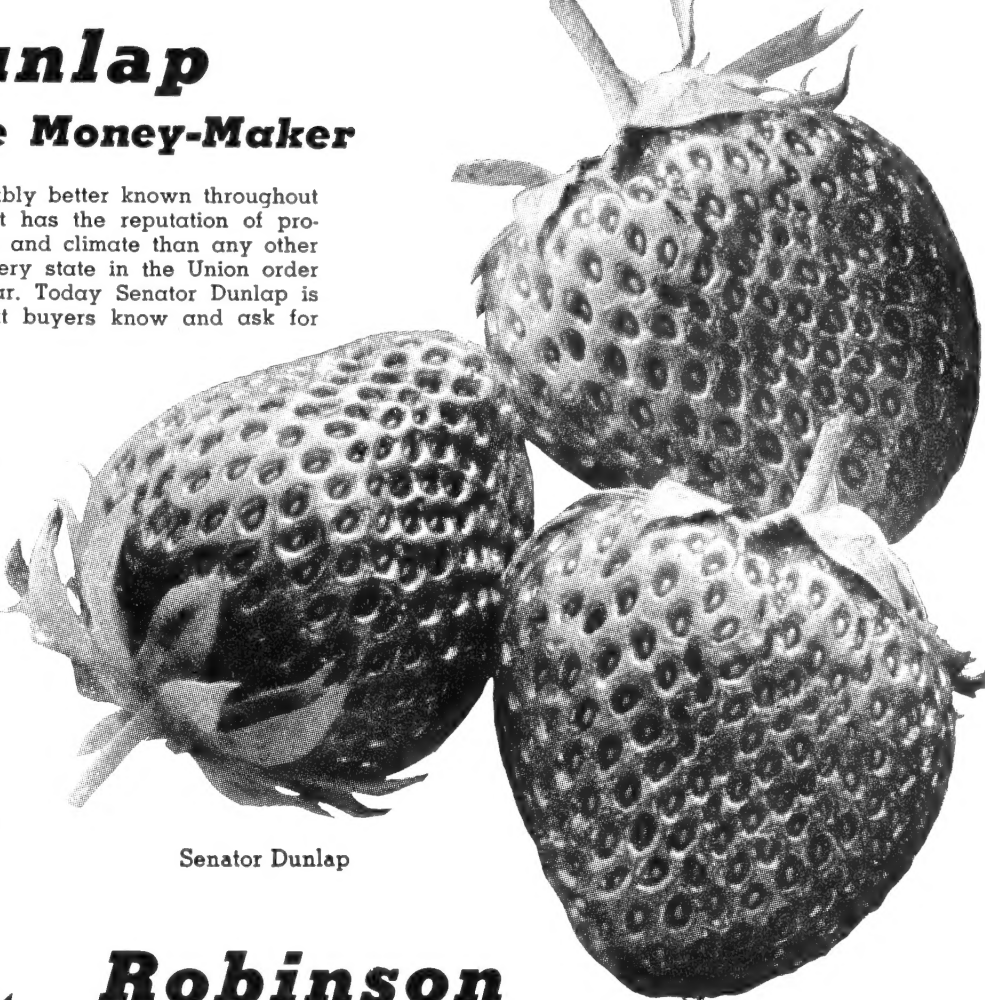

Senator Dunlap (or Dr. Burrill) is probably better known throughout the country than any other strawberry. It has the reputation of producing full crops in a wider range of soil and climate than any other variety. No wonder growers in nearly every state in the Union order more of this old reliable berry every year. Today Senator Dunlap is one of the three or four strawberries that buyers know and ask for throughout the country.

Certain Crops Everywhere

Many canning factories want nothing but Senator Dunlap and contract for thousands of cases yearly. They know it always holds its shape and rich color long after canning—and that the flavor lasts. Uniform berries of glossy, dark red. Last year we sold out of Dunlap early and the demand is equally heavy this year. We have a good supply but urge you to order yours early. *Ripens Mid-Early.*

Senator Dunlap

Robinson

The Modern Main Crop Berry

Originated in this famous Michigan strawberry section and tested here for about 5 years, Robinson was generally sold four years ago and has fully proven its reputation as one of the best strawberry varieties. Robinson has been called a Super Berry and that was saying a lot, but by the way it has proven itself, it was not saying too much. A strong, vigorous grower, it produces an unbelievable number of new plants in most any soil. This insures a big crop and the berries are above average in size because each plant usually has only one fruit stem and has lots of vitality to produce these big berries.

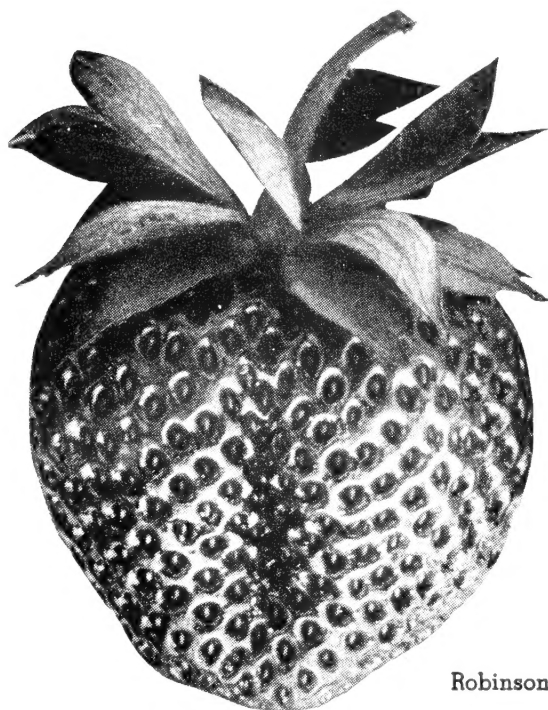

Early Season—Quality—Color—Firmness—Size

Robinson berries are finest flavor, good glossy red color, big in size and firm. All these points make it an ideal berry for marketing nearby or far away at the top price, and they also make a berry that is just what you want in your garden to eat and can.

Planting Genuine Robinson Insures A Profitable Berry Business

Catskill

Dorsett

The Early Quality Berry

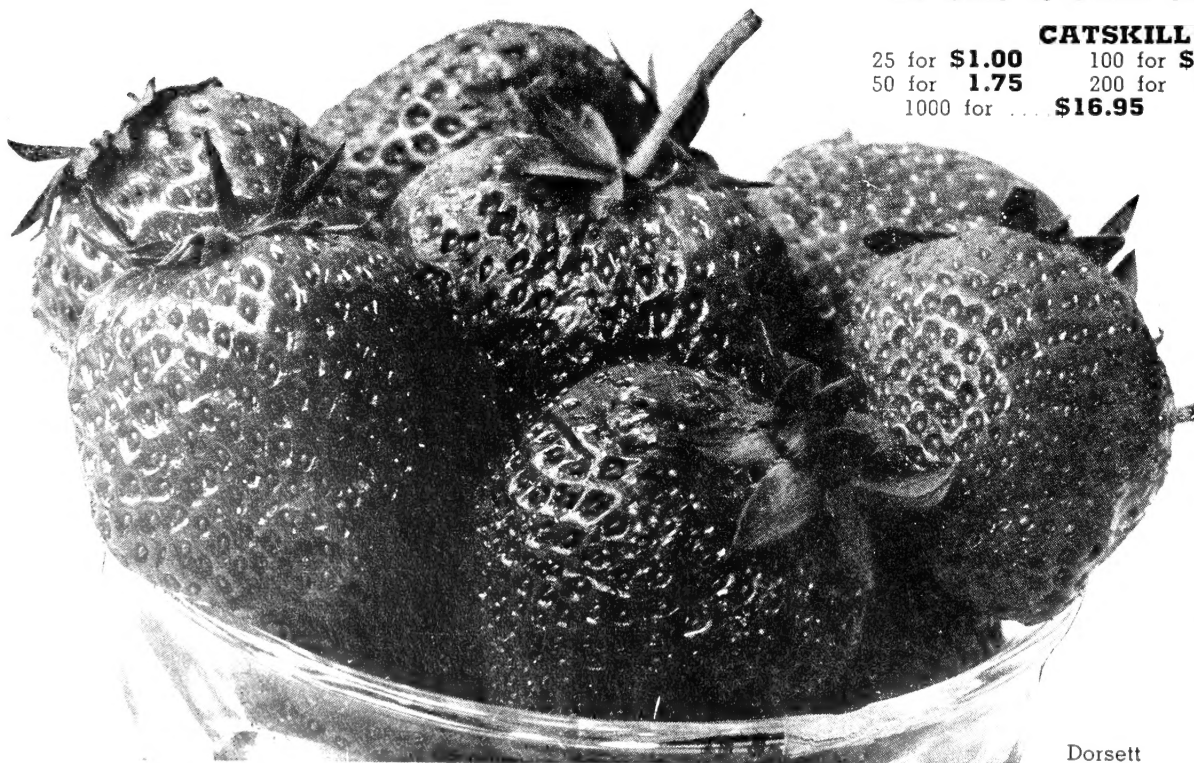

One of the best for big regular crops. You can depend on it for good profits every year. Dorsett has been widely planted in all fruit sections and has come through with paying crops every time.

Every Desirable Strawberry Feature

Experiment Stations in Michigan, Illinois, New York, and Washington, D. C., do not hesitate to say that it is superior to Premier in size and quality. Ripens almost as early as Premier, a vigorous grower making many plants—assuring good crops even in poor seasons and soils. Commercial growers like Dorsett because it makes money. Its firmness, big size, exceptionally fine flavor and bright color are just what both wholesale buyers and the housewife want. **We have a stock of fine, genuine Dorsett. Don't wait—there is a big demand.**

Dorsett

Catskill

Big Midseason Berry

It is only once in awhile that a new variety proves so satisfactory in every way and so profitable as Catskill has done. Its biggest feature is its enormous crops of big, fine, bright scarlet, green-capped berries. Picking begins just after the early kinds and Catskill berries are of great size and firmness to the last. Plants are unusually strong, hardy, healthy little affected by diseases and will produce their great yields in all soils and seasons. With Premier for early and Catskill for midseason to late, you have a combination for top prices over the best of the strawberry season. We recommend Catskill fully.

Enormous Crops of Fine, Big Berries

For home garden, Catskill is ideal because its fine flavor, rich color and large size are just right for canning and preserving or fresh for table use. New York Experiment Station, the originator, says:—"Catskill is notable for being very large and very productive. Plants are vigorous and free from leaf-spot. Ripens later than Premier and is of better quality as well as being larger. Much more productive than Dorsett and Fairfax."

New Fairland

A Better Strawberry For Home — For Market

Fully Red-Stele Resistant

This new variety was released by the U. S. Dept. of Agriculture for general introduction last spring after 10 years of testing. The Department says of FAIRLAND:

- "1. A new early Red-Stele resistant strawberry for northern states.
2. Ripens 2 to 6 days after Premier.
3. As productive as Premier, with firmer, large light bright red berries.
4. Best adapted to those sections where Premier is grown."

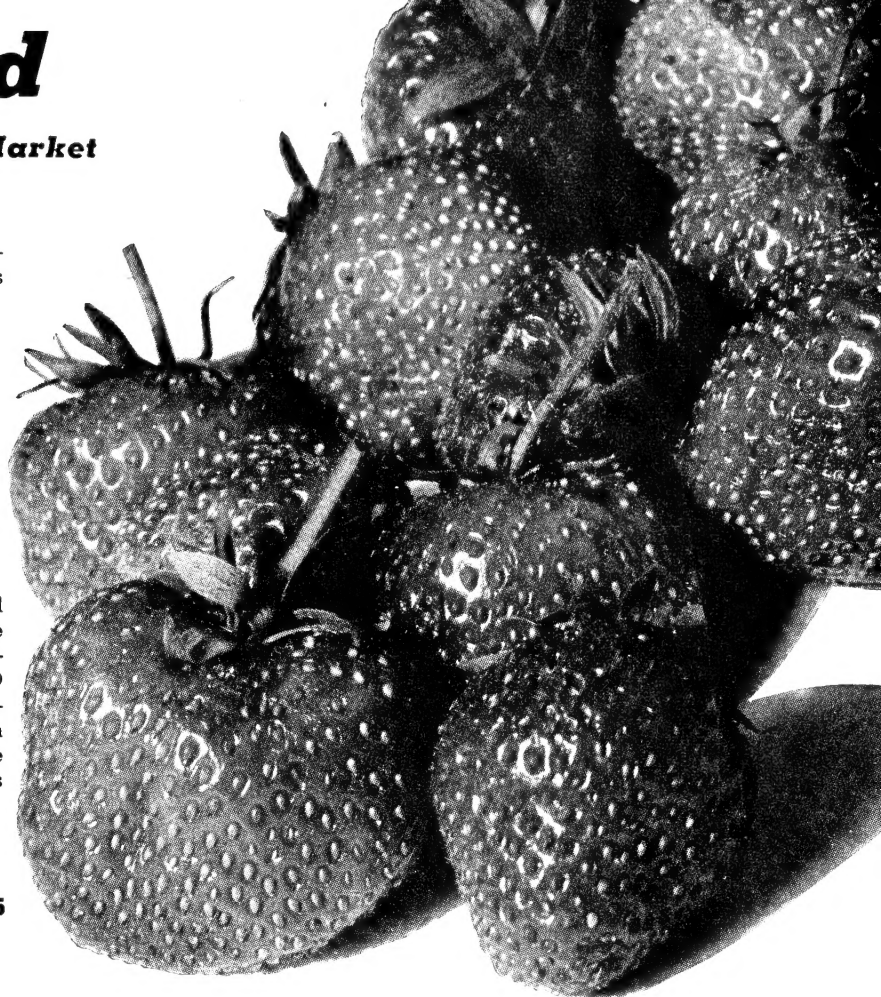

A New Berry For Premier Growing Sections

Commercially FAIRLAND has proven a good shipper and profitable market berry—equal to Premier. This, and the fact that it is entirely Red-Stele resistant, and does particularly well in northern states makes certain that FAIRLAND will be a widely planted leading commercial berry. FAIRLAND berries are unusually uniform in shape, attractive in appearance and excellent in flavor. A fine, dependable home-garden berry. You will want to plant FAIRLAND this spring.

FAIRLAND PRICES

Low Prices for this Proven, Profitable New Berry:

25 for **\$1.10**; 50 for **\$1.85**; 100 for **\$3.15**; 200 for **\$5.75**

 2000 for **\$33.50**.

The New Temple Strawberry

Fully Red-Stele Resistant

Early, Productive Amazingly Vigorous

Wherever red-stele disease is a problem, the new TEMPLE variety is the one to plant because it is fully resistant to this disease. Also, it has proven largely immune to other strawberry troubles. When cold and frost damaged other varieties, there was no injury to TEMPLE. This is the general report of the U. S. D. A., on this new berry and you can see at once how valuable an addition it is to strawberry growing—whether for home or market.

Large, Firm, Bright Red, Sweet

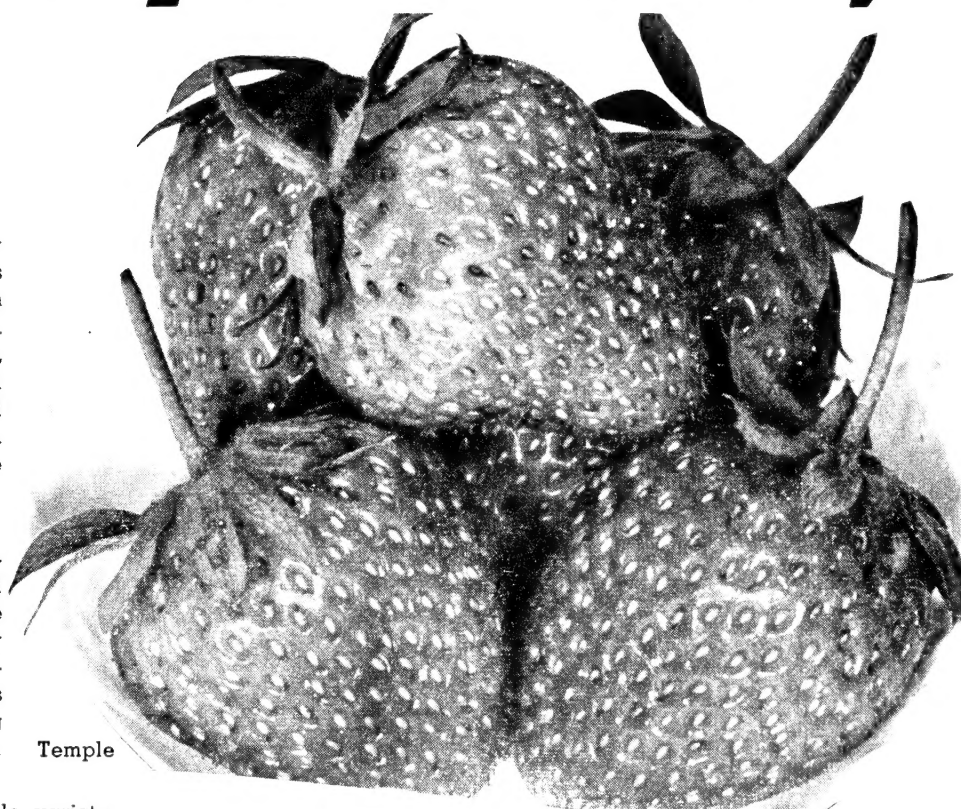

Originated in 1938 by the U. S. Dept. of Agriculture, TEMPLE was selected from many thousand seedlings, because it is fully resistant to red-stele and at the same time has the qualities necessary for a successful commercial berry. It is an exceptionally vigorous grower, produces good crops early in the season and the fruit is firm for long distance shipment. Large, smooth, bright red sweet flavored berries with large green caps.

Temple

TEMPLE promises to be an exceptionally valuable variety and we have made the price low so that everyone can get a good planting this spring.

New
Sparkle

SPARKLE

A Sparkling New Strawberry

Bears Midseason to Late

Rich, glossy-red, smooth berries with big green caps actually sparkle. They make a beautiful box of fruit. Their flavor is as good as their appearance, equal to Fairland and better than Premier. Berries are of good average size and remarkably uniform in their oval shape and smooth skin.

Particularly Satisfactory for Northern Planting

When grown in the states north of the Ohio River, Sparkle has proven a firm, good-shipping, money-making berry. The fact that Sparkle is especially resistant to red-stele disease, a heavy plant maker and notably hardy in colder winter climates guarantees consistent profitable crops that come on the market after the earlier varieties are gone. Sparkle is especially delicious when quick-frozen in locker plants or home freezers—keeping its color, shape and fine flavor. This new berry is proven and ready for wide and satisfactory planting and use.

Grand Champion

The 40 Day Fruiter

Tall vigorous plants protect early blossoms from frost and also keep the last berries fresh and bright. Unusually frost resistant; ripens over an unbelievably long season, beginning a few days after Premier—sometimes lasts 40 days. Big crops, good quality, fine flavor and great size. We recommend Grand Champion for your fruit garden. Few strawberries have the uniformly large size, bright red color and even shape that Grand Champion does. It could well be more widely planted for it really is a "Grand Champion."

Everbearing
Superfection

New Everbearing Strawberries

The Latest Introductions

Just as 1950 automobiles are better than those of 1940, so these three new Everbearing Strawberries are greatly improved over those of 10 years ago. Modern scientific plant breeding has given us better flavor, better color, more productive plants and all-around more dependable new varieties. Minnesota 1166 (Evermore), Streamliner and new Superfection are the latest and best introductions generally offered for sale today. Easy to grow in any garden, all self-fertile and full crops are certain.

Streamliner

Minnesota 1166 The University Development

Minnesota 1166 (Evermore) is a heavy-yielding Everbearer. This past season the sturdy plants were loaded with great berries from July until into November. They sold for \$10.00 and \$12.00 for a 24-pint crate at wholesale. Think of it! Back in 1942 when prices were lower, 1,200 plants set in April had made \$500 by November 18th. We think Minnesota 1166 is about the finest and heaviest producing Everbearer we have seen.

Fruiting Season — July to November

Berries are rich, solid, dark red all the way through. Large size, with a rich, sweet, mild flavor. Very good plant maker—better than Mastodon and about like Gem. Originated by the Minnesota Expt. Station, this everbearer is one of the hardiest berries grown.

Easy to Grow in Any Garden

If you plant Minnesota 1166 this spring you can enjoy fresh Strawberries from your own garden this summer. They are delicious, healthful and economical—summertime's most delicious fruit. Plants are in big demand because of its outstanding performance, so order yours early.

MINNESOTA 1166 PRICES

25 for	\$ 1.35	300 for	\$ 9.25
50 for	2.45	500 for	14.45
100 for	3.95	1000 for	25.00
200 for	7.15	2000 for	45.00

Streamliner The Sensational Everbearer

STREAMLINER is as new and modern as its name. New because this is only the 4th year of general sale, and modern because it has all these good points we want in an everbearing strawberry today:

- Delicious, very sweet, real strawberry flavor.
- Very hardy, productive plant.
- Rich, radiant, solid red color all the way thru.
- Excellent for canning and freezing.

This year STREAMLINER will be available in limited quantity from coast to coast. You will want to be among the first in your neighborhood to have this fine Everbearer—a really wonderful all around strawberry. Strawberries are one of the finest frozen fruits in home or commercial freezers and this new berry is especially delicious because it is naturally so sweet.

Not a heavy plant maker, but makes enough to produce plenty of fruit. Berries are round in shape and firm in texture—presenting a fine appearance on the market. You will want to get started with STREAMLINER this spring—have a full crop this summer and fall. The supply of plants is still limited. ORDER YOURS EARLY.

SUPERFECTION— All The Name Implies!

New Low Prices for this New and Better Everbearer

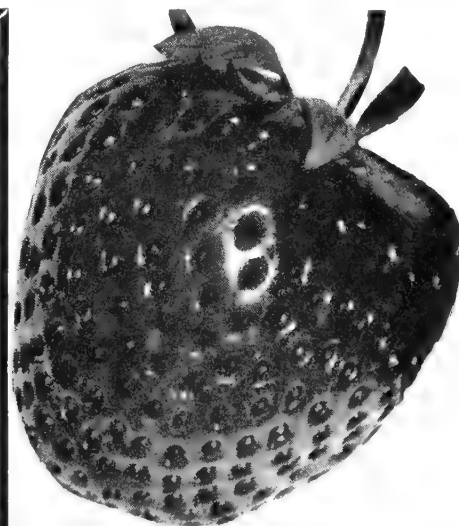

Introduced by the originator of Gem, Superfection is one of the newest and best everbearing strawberries resulting from modern plant breeding. A hardy, vigorous grower under Michigan's winter weather, it has produced plenty of plants and berries in leading strawberry growing sections.

Larger, Fine-flavored, Round, Firm Berries

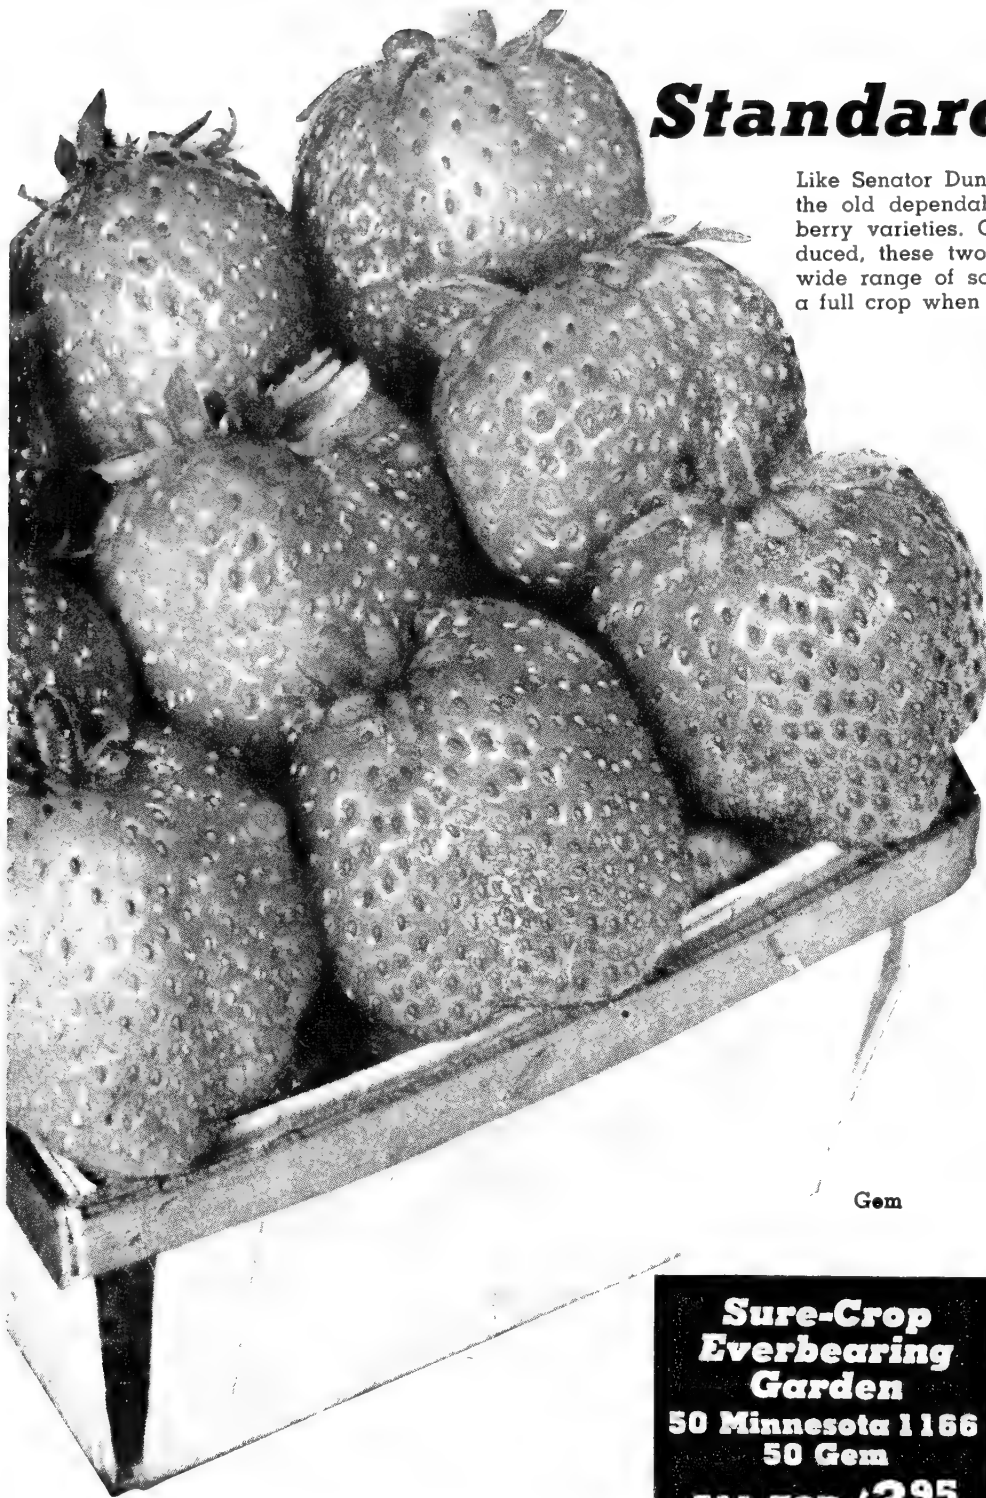

You will want to have this exceptionally fine everbearer. Begins to bear 90 days from planting. Produces ripe berries next year in Spring, Summer and Fall. Large bright red berries with an extra delicious flavor. You will be satisfied with Superfection Everbearer.

Minnesota 1166

Standard Everbearers

Like Senator Dunlap in June-bearing kinds, Gem and Mastodon are the old dependable, standard standbys among Everbearing Strawberry varieties. Out of the many everbearers that were first introduced, these two have proven their value and dependability in a wide range of soils and climates. Both are self-fertile and produce a full crop when set alone and will not mix with other kinds.

Gem

The Dependable Everbearer

Make Money This Fall With Gem

Gem is the everbearer fruit growers have been looking for, because, unlike all other everbearers, it is an excellent plant maker on good or poor soils and in wet or dry seasons. This fact means that it can be depended on for good crops every year. Here we have a really fine fall berry of good size, fine flavor and unusual firmness.

Productiveness—Flavor—Firmness

- 1. Productiveness.** GEM makes so many more plants than other everbearers that it produces many more berries.
- 2. Flavor.** A true strawberry flavor—something most everbearers don't have.
- 3. Firmness.** Remarkably firm—only everbearer that reaches market in really first class shape.
- 4. Profits.** Because of size, firmness and sure crops—good profits are certain.

MICHIGAN EXP. STATION SAYS:
"Gem is certainly a wonder as far as plant making is concerned and it certainly bears well."

You can plant Gem with full confidence of a full fall crop and good profits.

GEM PRICES

Mastodon

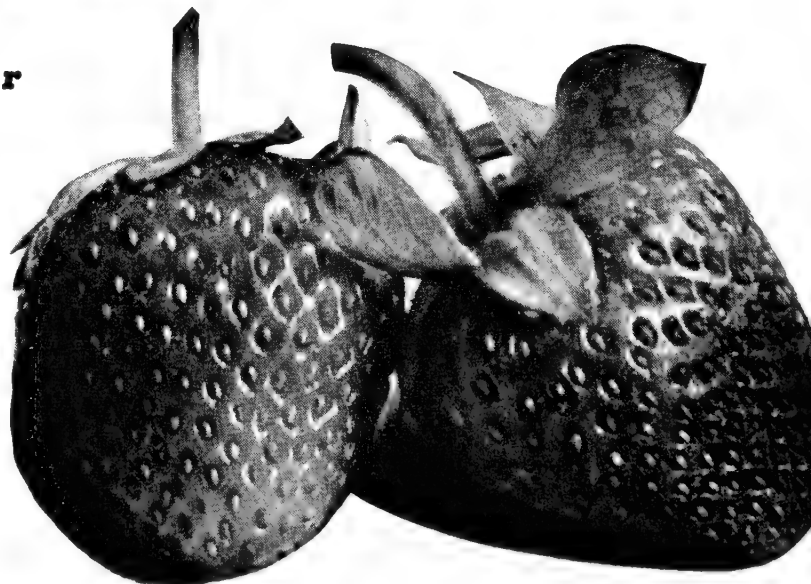

The Pioneer Favorite Everbearer

Everyone wants and needs a good everbearer that can be depended on to produce plenty of good fruit regularly in the late summer and fall. Mastodon has shown year after year that it will do this in all sections and under most any soil and weather conditions. It is entirely satisfactory for the home garden or commercial patch. Our **Mastodon Plants** are guaranteed true-to-name and will do these things for you. Through years of proper selection and propagation they are superior in vitality and productiveness. The berries are "Mastodons" in size.

Plant plenty Mastodon and have good fruit to sell at top prices this summer and fall. ORDER YOURS TODAY.

Grow Grapes for Profit

NEW FREDONIA A Better Extra Early Black

FREDONIA ripens 10 days before Moore's Early and 3 weeks ahead of Concord. Berries are very large, hang well to the bunch and are firm, juicy and of fine flavor. Skin is thick and tough to make a good shipper. Vine is vigorous and productive with medium size very compact bunches.

Early grapes make the most money and FREDONIA is a fine quality extra early grape far ahead of any other early kind now on the market. The bunches keep their vine-fresh firmness and fine appearance for days after picking. Begin your planting this spring.

CONCORD The Universal Black Grape

Always in good demand—the standard by which all other black grapes are judged. No vineyard or arbor is complete without Concord. Best for market, eating and home use.

It is the main crop for every grower everywhere and produces big crops on any soil every year. After the first expense the cost of up-keep is but little. It is a profitable permanent investment.

Our Concord vines are well rooted, especially adapted to the central west, and guaranteed to reach you in perfect growing condition.

NEW SENECA

Skinless — Golden Yellow — Sugar Sweet

This is the newest of the California-type hardy grapes and one of the finest flavored in any color! The oval-shaped fruit is golden yellow, with firm meat, juicy, and a deliciously sweet flavor—and the skin is edible! The vines produce long, compact, medium size bunches, and are perfectly hardy wherever other northern grapes grow. This is one of the early grapes—ripening here in September. We suggest you get two or three vines this spring.

GOLDEN MUSCAT

California-Type Grapes Now Hardy in the North

Here you have all the delicious, mild, sweet flavor; firm, meaty flesh; wonderfully fragrant aroma; and large size, beautiful, waxy, golden yellow fruit of the true California muscat. These new type vines are hardy and can be grown anywhere our northern grapes are grown. Golden Muscat should be money-makers because of their size, color, high flavor and unusual firmness and good shipping qualities. (Not a California grape.) Begins to ripen about 10 days after Concord.

NIAGARA—(White)

Best White Grape for Every Purpose

The best known and most popular of all white grapes, ranks with Concord in heavy bearing, size and quality.

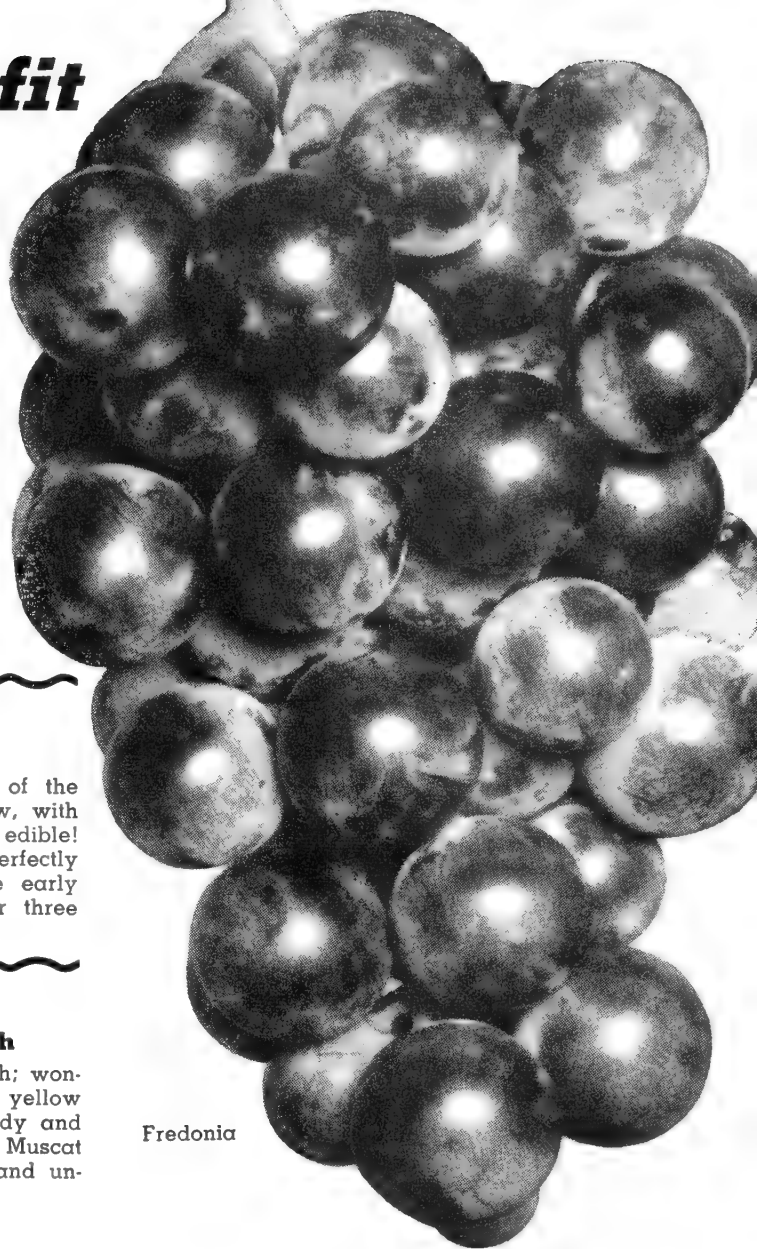

Medium compact, large bunches; berries mostly round, of greenish-white color; very juicy and of excellent flavor, skin is thin but tough and does not crack, making it a fine long-distance shipper. Hardy, vigorous grower.

NEW CACO—(Red)

Caco is A-1 in every respect. Hardy, quick bearing, produces every year; fruit beautiful, unusually large size, clear amber color and best of all has a flavor of such sweetness it is a superior table grape. Always in demand at grape markets with extra prices. Vines just as easy to grow as any other.

DELAWARE—(Red)

Long called the standard of excellence of all grapes as a table delicacy. Bunch small, compact; berries small with thin skin and of unusually sweet flavor. Ripens with Concord. Hardy. It is impossible to tell you how really delicious these little red grapes are.

Fredonia

NEW VAN BUREN

Extra Early Black

An extremely early grape of superior quality, similar in flavor to the well-known delicious Concord. This variety was introduced by the N. Y. Experimental Station and is one of the best early blue grapes yet produced. Ripens in mid-August, even earlier than Fredonia. The vines are extremely hardy and produce an abundance of good size, sweetly delicious fruit. Thoroughly tested in grape growing sections and highly recommended for commercial planting.

PORTLAND—(White) Fine Extra Early Grape.

Similar to Niagara in its large size bunch and full oval berries, Portland ripens three weeks earlier. Production is heavy, young vines bear early and bear good crops every year. Berries are of good size, fine and sweet in flavor. Vines entirely hardy. Introduced by N. Y. Expt. Sta. and is proving an excellent profitable grape because it ripens so early and its quality is so good.

RHUBARB — Grow It for Home or Market

← MacDonald Crimson

This new red variety is the best of all. Yields heavily from spring right through to late summer because it never goes to seed. Will last for years. Produces unusually large attractive crimson stalks and the good thing is that they are very tender and juicy (skin and all); not tough or stringy as most large stalks are. If everyone knew this grand new red rhubarb no other kind would be planted. It is so much better in every way—large size, rich red color and best of all a deliciously mild flavor. Ours are strong division roots—will make fine large stalks this summer.

Price: Each 50c; 3 for \$1.35; 6 for \$2.45; 12 for \$4.60; 25 for \$8.50.

Canada Red

A new red rhubarb in top place for appetizing red color and delicious flavor. A vigorous, hardy grower its long tender stalks rich red right through. Milder flavored than most kinds. Many consider it the best rhubarb yet introduced. Plant a few roots and enjoy it. Grows easily in any good garden soil.

Price: Each 60c; 3 for \$1.60; 6 for \$2.85; 12 for \$5.80; 25 for \$10.25.

Myatt's Victoria

Victoria is the preferred market variety and is generally planted. Good for winter forcing, too, when prices are highest. Attractive pink stalk, delicious mild flavor.

VICTORIA CLUMPS

Large 2-year-olds, ready to produce this summer. Just the thing to get Rhubarb started quickly in your garden.

Prices—Each 25c; 3 for 65c; 6 for \$1.20; 12 for \$1.95

This pink stalk, tender variety is preferred and brings best prices. Our stock is carefully grown from guaranteed tested seed. Transplants easily; produces abundantly.

1-yr., 1/2 to 1 Inch—Each 12c; 6 for 55c; 12 for \$1.00; 25 for \$1.60; 50 for \$2.95; 100 for \$4.95

RA-PID-GRO The Liquid Plant Food

An easy-to-use, tested and proven plant food containing all the essential elements for a quick start and rapid, healthy growth. Four teaspoonsful of Ra-Pid-Gro powder to each gallon of water makes a liquid fertilizer that is immediately available to plants, trees, shrubs and perennials. For transplanting it shows remarkable results in quick growth when roots are dipped. Regular two week feedings during the growing season maintain vigorous growth. Ra-Pid-Gro is fine for lawns and makes better vegetables. Complete directions with each package. One pound makes 22 gallons or 176 pounds of rich plant food. You will like Ra-Pid-Gro — it is inexpensive, easy to use, and most effective.

**1 pound package \$1.25
2 pound package 2.35
5 pound package 4.50**

Asparagus

Asparagus is easy to grow and you can make big profits from a small space. 50 to 150 plants will supply this delicious food for the family. A bed lasts for 10 to 15 years, and you can depend on heavy regular crops from our roots. It is most important that you get strong, healthy true-to-name plants. We grow them by the thousands from guaranteed tested seed on special soil to give you the best planting stock.

Mary Washington ➔

Developed and recommended by U. S. Dept. of Agriculture. Heavy yielding, pedigree strain immune to rust; grows rapidly and produces uniformly tender shoots of excellent table quality.

Now that canning companies have found how to can asparagus and retain all its delicious flavor and healthful food qualities they are contracting for greater supplies every year. At the same time there is a rapidly increasing demand from grocery stores and commission merchants for fresh asparagus during the summer season.

\$4,000.00 from 4 acres—That is what one local grower made from his field of asparagus, and shows what can be done with the present day asparagus market. 5,000 roots plant an acre. Here the cutting season begins in May, before any other cash crop.

There is a steady demand with average prices of 7 to 10 cents per pound. You can make money growing asparagus now!

Paradise Asparagus

Bears A Big Crop in Only One Year

That tells the story of this remarkable new Asparagus. It comes into full production quickly—no need to wait 2 or 3 years to begin cutting. PARADISE was bred and developed to do just that. It is rust resistant and produces great, wonderful appearing stalks of delicious flavor. Paradise is a most excellent asparagus for home use and profitable market sale. We are glad to offer this new, early producing variety at these low prices:

Black Raspberries make money

Black Raspberries have regularly been bringing better than average returns every year. Fruit canneries always contract for a good part of the crop and this insures better prices all around. These are proven, profitable varieties. Michigan grown, double inspected raspberry plants are recognized throughout the country as the best. Our soil is especially adapted to produce sturdy, well rooted quick growing plants. Such first class plants, disease-free, are necessary for satisfactory crops of berries.

Cumberland The Leading Commercial Variety

Clear money above all expense is what you want and you can depend on our heavy producing, vigorous plants for it. Cumberland is still the leading berry in the plantings of commercial fruit growers everywhere. Government Experiment stations have found none that promise to be a better money-maker.

Low Prices for Dependable Certified Plants

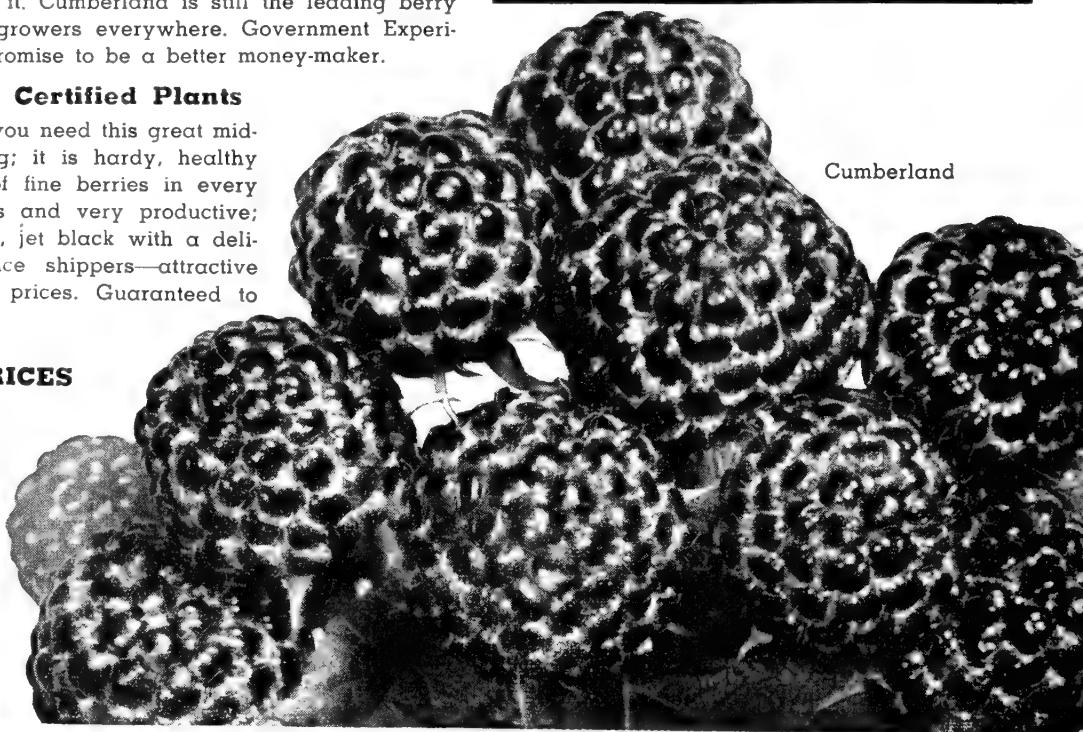

If you grow Black Raspberries at all you need this great mid-season berry for a complete planting; it is hardy, healthy and produces its big paying crops of fine berries in every fruit growing section. Plants vigorous and very productive; thrive everywhere. Berries large, firm, jet black with a delicious flavor. Wonderful long distance shippers—attractive appearance—always command good prices. Guaranteed to please you.

Bristol

For The Home Garden

This is a top quality blackcap that is widely adapted in all raspberry sections. One of the finest for home gardens everywhere. Bears heavy crops of large, glossy, fine-appearing berries. Its resistance to usual raspberry diseases means a long lived planting. Bristol is well worth much wider planting for both home and commercial use. We have a reasonably good supply of first class plants but you should order early.

Price — 12 for \$1.10; 25 for \$2.00; 50 for \$3.45; 100 for \$6.25; 200 for \$11.00; 300 for \$14.85.

Bristol

Morrison

The Big Profitable Late Berry

Here is a really better late Black Raspberry for both home and market use. Ripens about one week after Cumberland. Morrison has now been widely tested from Pennsylvania to Michigan, and has proven head and shoulders above other varieties in most every way. Commercial growers say: "Largest blackcap I have seen." "Practically disease free." "Larger and firmer than Cumberland. Does not crumble." "Holds its size to the last of the picking season." "For two years it has brought more than other varieties on the Pittsburgh market." One third larger than any other blackcap.

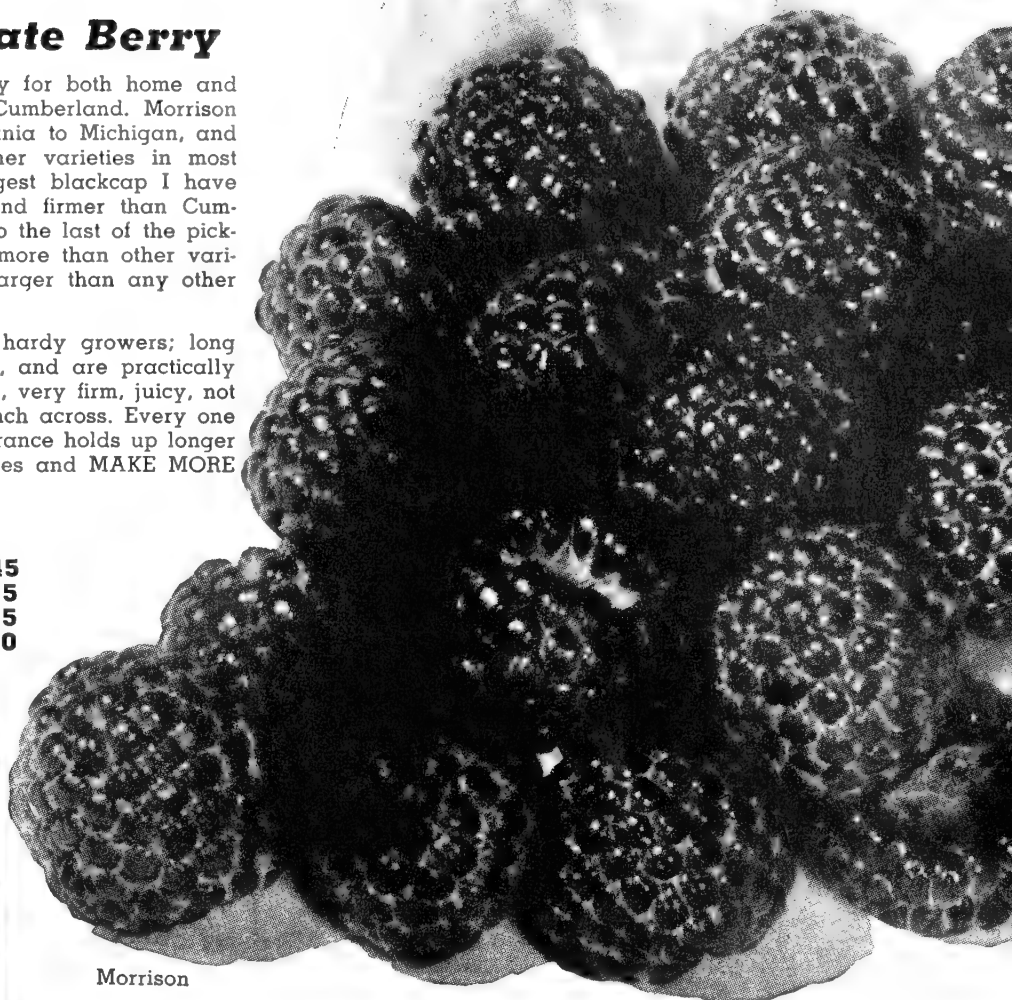

The big bushes are exceptionally vigorous, hardy growers; long lived (some producing well after 12 years), and are practically disease free. Morrison berries are high flavor, very firm, juicy, not so seedy, and the size averages almost an inch across. Every one is a brilliant, glossy black. This bright appearance holds up longer in grocery and market, outyield other varieties and **MAKE MORE MONEY FOR THE GROWER!**

Logan

Most Widely Planted Early Blackcap

This early variety has all the good points other early berries have lacked. Berries are good size, do not crumble (unusually firm), do not dry up, hold a glossy black color and have a deliciously sweet flavor. Logan is a fine home garden berry.

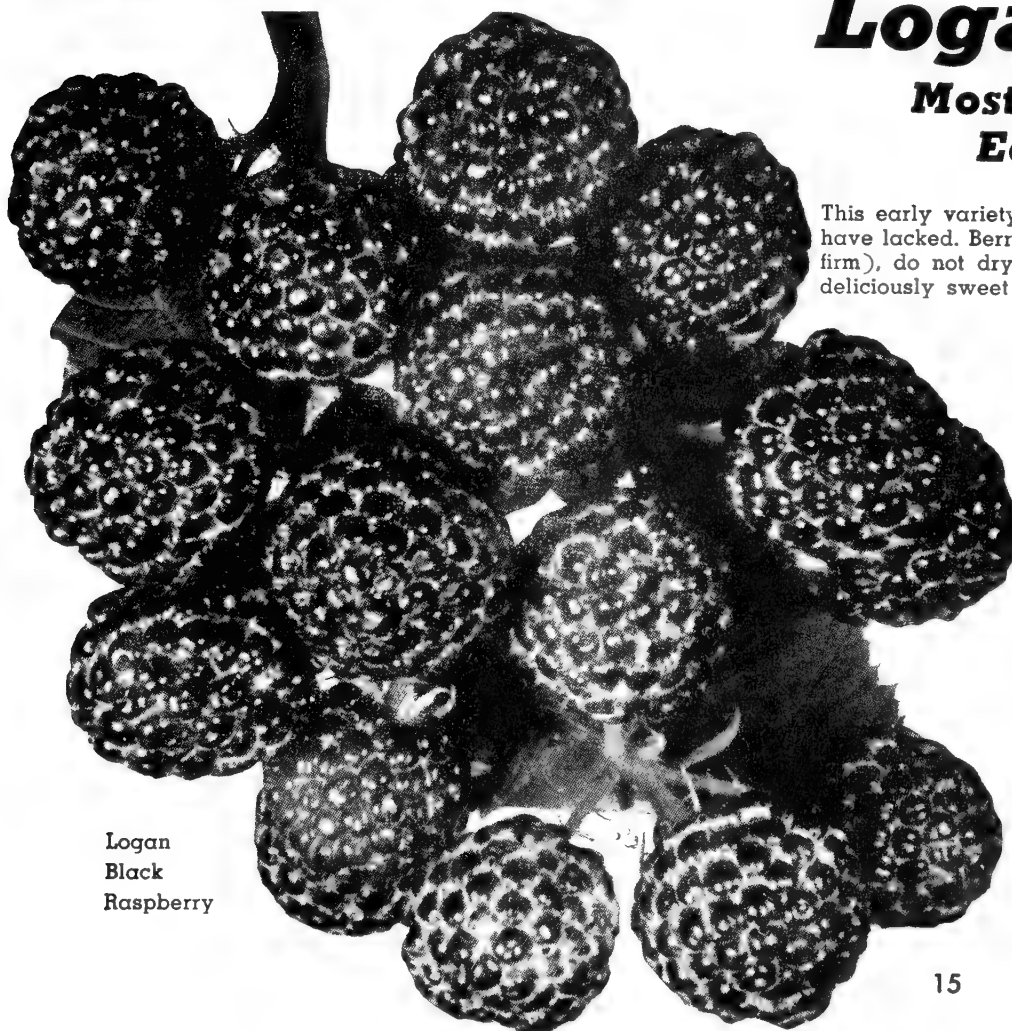

Bears heavily, maturing most of its crop before Cumberland begins, and so gets the best of the early high prices. Canners like its rich flavor and uniform berries.

Logan is recommended by Michigan and Ohio Experiment Stations and is an entirely satisfactory commercial berry in the great fruit sections of these states. Remarkably free from and resistant to disease; a strong grower, throwing out plenty of fruit canes.

We recommend Logan for its earliness, its excellent quality, its firmness and color for market. Plant Logan and you will be well repaid. Our price is low for this fine Early Raspberry.

Sodus Purple Raspberry

The Best for Jam and Jelly

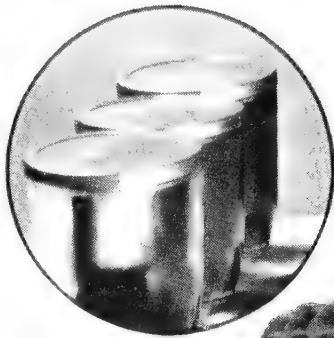

If you have not eaten purple raspberries both fresh and canned, you have a delightful experience coming, for these berries have a color, aroma and fine flavor that call forth that "more" taste. They are something deliciously different. Its distinctive flavor and great size are what everyone wants for canning and pies.

This better purple cap is a money-maker because of its great size, attractive color, extra firmness and exceptionally heavy crops. Giant, bright purple berries, do not crumble, borne in great clusters on every branch. Flavor good—a blending of red and black raspberry.

SODUS is a rapid grower with great strong canes to carry its big load of fine fruit. So far it has shown almost complete freedom from mosaic; plant safely anywhere. Had no winter damage when others were frozen. Stands dry weather unusually well.

Sodus Has Size, Color and Quality

Sodus is the best of all purple sorts generally planted today. A good sized, fine flavored purple raspberry with attractive appearance will make money. SODUS is such a berry and deserves extensive planting for commercial use. Plant Sodus for a really good purple cap.

New Thornless Boysenberry

Mammoth Size - No Thorns

Ripens 10 Days to 2 Weeks Earlier

Think of the pleasure of picking a berry with the great size, fine appearance and deliciously different flavor of regular thorny Boysenberries, that is entirely free from thorns, too. That is what you have with the new Thornless strain. The only difference we can see is that the berries are slightly smaller than the regular Boysenberry. Thornless brings you ripe fruit about two weeks earlier, too.

Fine for Jams, Jellies, Pies

Boysenberry is a cross of Blackberry, Raspberry and Loganberry. Berries dark reddish-purple, wine-colored, juicy with a high flavor not found in other bush fruit. Unbeaten for jellies, jams, pies. A dozen plants give you all you can use and some to sell. Easy to grow and quick to bear a big crop, with beautiful berries decidedly different in flavor—you just cannot beat these "pleasant-to-pick" Thornless Boysenberries.

Thornless
Boysenberry

Standard Boysenberry

\$800 to \$1,500 Income Per Acre

55 of the largest berries fill a quart basket. Average size, 1 inch diameter, 1½ to 2 inches long—largest bush or vine berry known. Bushes are hardy (has stood 19 degrees below zero). Its exceptionally rapid growth, heavy crops, immense size and deliciously different flavor will amaze you. Grows like a dewberry and is as easy to raise. Ripens with them and fruits over a longer season.

Enormous Spicy Purple Berries

Boysenberry is a real money-maker because of its outstanding features of immense size, exceptional productiveness, unusual flavor and fine appearance—it is impossible to realize how far superior in all of these qualities it is until you have seen it. Market growers are greatly increasing their Boysenberry plantings because these larger, better berries are proving big money-makers for them.

WORTHWHILE NOVELTY**

Latham Red Raspberry

The Most Profitable Late Red

Latham has definitely proved to be the best red raspberry money-maker in every fruit section of the country. Each year for the past five years we sold more Latham plants than all other red varieties put together.

For general planting in all sections, Latham is the best because this hardy, vigorous grower can be depended upon for big annual crops of finest looking berries. Fruit buyers on every market pay a premium for Latham's bright color, firmness and long keeping quality. These things and its most delicious flavor make it equally desirable for home gardens.

Hardy, Productive, Dependable

Hardy and very productive—far out-yielding older kinds, it ripens from mid-season to late. We wish we could convince you what a truly fine berry

LATHAM is in every way. If you have grown it you already know. Berries are all above average size, bright red, and make the most attractive appearance of any red variety; the flavor is of the finest. You will make no mistake in planting all you can.

Latham Is Still the Best Fruit Everywhere for Profit

FOR CANNING—Jams and Jellies—Unusually rich color that does not fade, and what a wonderfully delicious, true, fresh raspberry flavor! The ideal berry for canning uses.

GOVERNMENT EXPERIMENT STATIONS—Recent reports from leading fruit states say that Latham is the best and most profitable berry for its season and highly recommend it for planting.

Taylor The Best Giant Late Red

Berries larger than any other, except Newburgh, uniform and pointed in shape, very firm (will not crumble when picking) bright snappy red color—all qualities that make TAYLOR an ideal shipper, arriving in best appearance to bring highest prices. Its large size holds up well over a very long season. Its deliciously sweet flavor and thick juicy flesh make it just right for eating, canning and preserving.

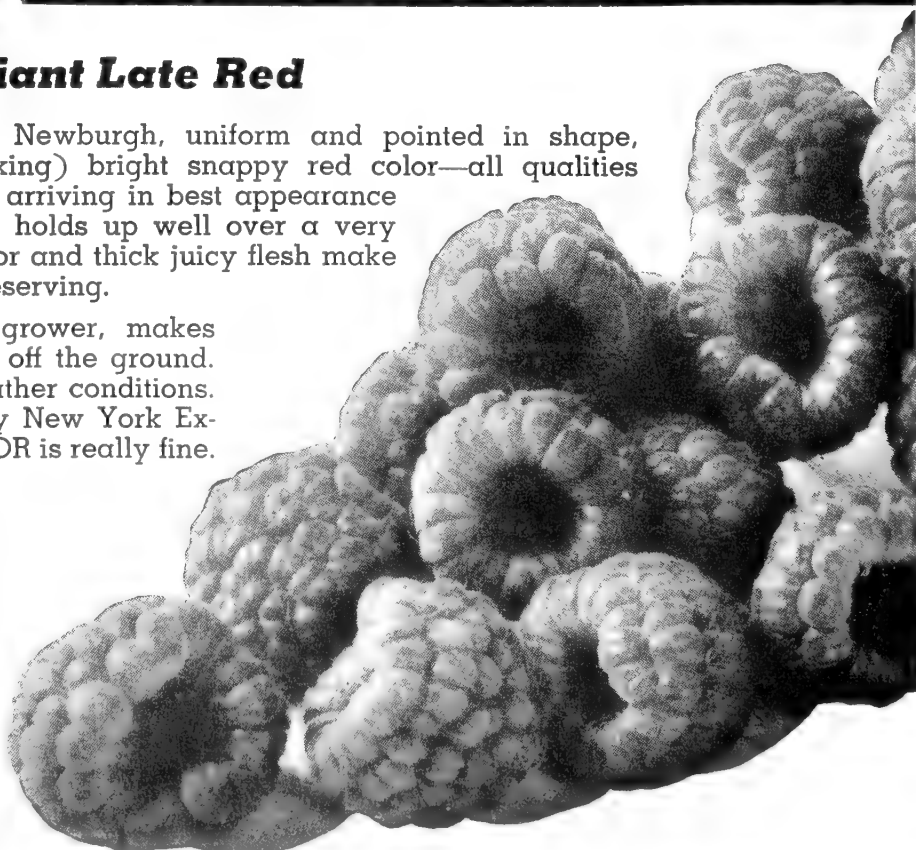

An unusually upright strong-caned grower, makes picking easy and keeps the fruit well off the ground. Exceptionally hardy under severe weather conditions. Crops unusually heavy. Originated by New York Experiment Station; one of its best. TAYLOR is really fine.

The New Sunrise Red Raspberry

Extra Early Extra Hardy Extra Quality

SUNRISE comes to you fully tested and proven as a better flavored, better quality berry for home use and an earlier ripening, hardier growing, more profitable variety for market. Here is its story—judge for yourself.

1. *Originated by U. S. Dept. of Agri. in 1923; carefully tested by them since and they say—"Of most importance from the standpoint of the practical grower perhaps, are the hardiness and resistance to disease of the plants, the earliness and larger size of berry as compared with St. Regis and the better texture and quality as compared with Latham."*
2. *Earliness—N. J. Expt. Station says: "The Special value of SUNRISE is its earliness. This year it was ready for first picking June 8, Chief on June 19, Latham June 23. In most cases SUNRISE will continue to produce some fruit even after Latham is practically finished."*
3. *Hardiness—U. S. D. A. says: "SUNRISE has shown resistance to low temperatures in mid winter at New Jersey with practically no injury, whereas Latham and some other varieties were severely injured."*
4. *Flavor and Quality—U. S. D. A. says: "More attractive than Latham—color is bright, turns dark red on ripening, berries pick easily. They are firm, fine textured, juicy, non-crumblly, mild in flavor, better quality."*

From these statements you can see what a superior variety in every way SUNRISE is. Don't wait longer to plant this new fine berry.

Thornless EARLY WONDER

Extra-Early Ripening Red

This is a new Red Raspberry that is THORNLESS—no thorns to prick when you pick or work around Early Wonder. The crop ripens 10 days to 2 weeks before Latham and early pickings always bring good prices. Large, bright red, firm berries make excellent shippers and their good quality and flavor wins favor for every use. This new berry was found here in the Michigan Fruit Belt and is a hardy, vigorous and productive variety.

Thornless Early Wonder promises to be a fine all-round red raspberry and one that you will want to get started with.

Indian Summer

Indian Summer

New Everbearing RED RASPBERRY

Here is a distinctly new type of everbearer, unlike any older kind. "Marvelous" justly describes Indian Summer. The quantity, size and quality of the berries it produces in September, October and November are truly marvelous because they are so far superior to any other everbearer. With such a berry you can make worth-while profits from the high prices always paid for off-season fruit. Makes a good early crop in the regular season.

The Best Everbearing Red

Berries are uniform, rich red, thimble-shaped, large and juicy; flavor a true, tart, delicious raspberry. A thrifty grower and heavy producer. You have never seen any fall berries as good in every way as INDIAN SUMMER. **Be sure to plant this spring.**

PIXWELL GOOSEBERRY

Larger Berries - Easier to Pick

An absolutely hardy, newer Gooseberry from North Dakota Exp. Station. Large, vigorous growing bushes carry heavy crops. It "picks well" because the berries hang on stems about 2 inches below the branches. Berries are large, oval, greenish-yellow to pink when ripe. For a plentiful supply of gooseberries for pies, jams and canning, put a few Pixwell bushes in your garden.

2 Year No. 1 Heavy Plants

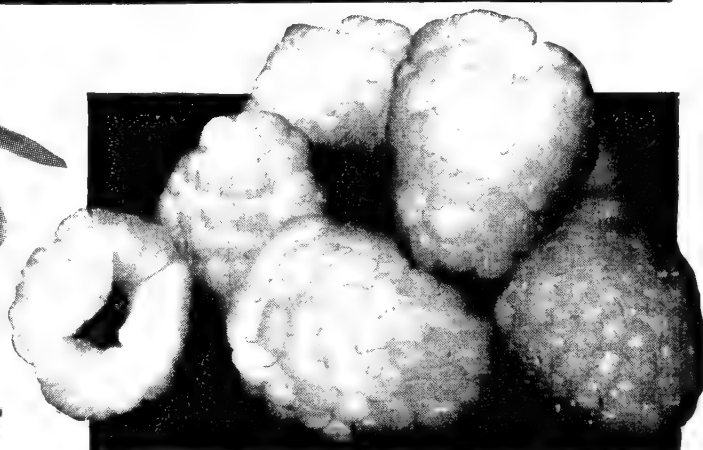

75c each;

GOLDEN QUEEN YELLOW RASPBERRY

Think of great, golden-yellow "red" raspberries of sugary sweetness—that's Golden Queen. There is nothing finer for table and canning than this heavy bearing, unusual and beautiful fruit. Canes are thrifty, hardy and almost free of thorns. (NOTE—the 2 year Transplants will begin bearing this year.)

PRICE: 1 yr. No. 1, each 25c; 3 for 65c; 6 for \$1.00; 12 for \$1.80; 25 for \$3.10; 50 for \$5.45; 100 for \$9.45.

2 yr. No. 1 Trans., each 40c; 3 for \$1.00; 6 for \$1.65; 12 for \$2.75; 25 for \$4.75; 50 for \$8.45.

DWARF FRUIT TREES

Many leading garden magazines and landscape architects point out the advantages of planting Dwarf Fruit Trees on the small home place. They are just the right thing because they make plenty of fruit on small space possible. At the same time they are ideal as beautiful ornamental trees.

Full Size Fruit on Dwarf Trees

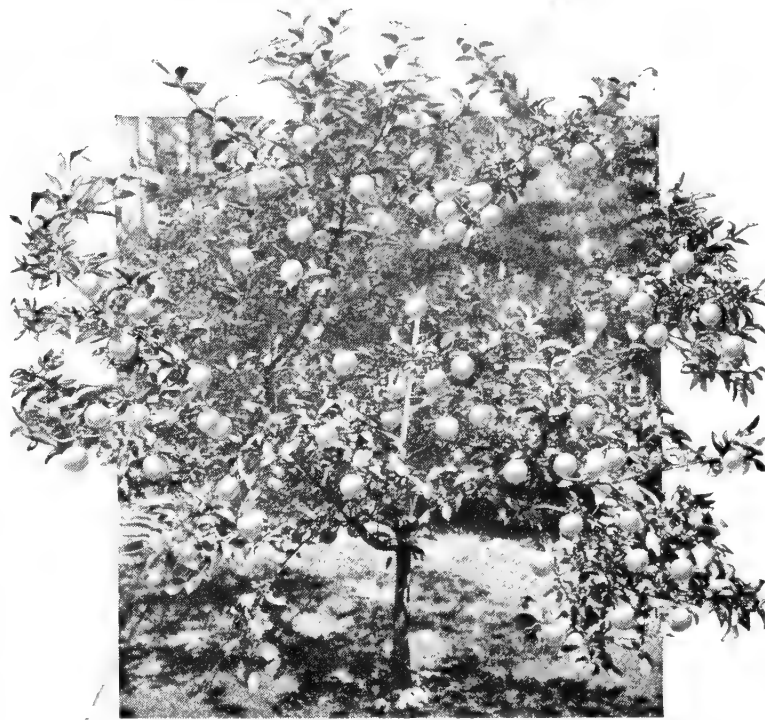

These little, sturdy, quick growing trees usually begin bearing the second or third year after planting. Their fruit is full size and as fine in every way as that grown on standard trees. Rarely grow more than 15 feet high and can be planted as close as 15 feet apart.

Ours are well branched, well rooted, 2 year old trees ready to make quick growth and good crops of full sized fruit.

DWARF APPLE TREES

Dwarf Yellow Transparent summer
Dwarf McIntosh early fall
Dwarf Yellow Delicious fall
Dwarf Red Delicious winter

2 year, 2-3 ft. trees:— **\$2.45 Each; 2 for \$4.50**

Dwarf Bartlett (medium)
Dwarf Seckel (sugar pear)

2 year, 2-3 ft. trees:— **Each \$1.95; 2 for \$3.45**
2 year, 3-4 ft. trees:— **Each \$2.35; 2 for \$4.25**

BLACKBERRIES

ALFRED—Alfred ripens a full 10 days ahead of Eldorado and continues all through the Eldorado season. Alfred berries are bigger, brighter colored, of better flavor and bring top prices right along. Once you grow Alfred you won't be satisfied with any other berry.

ELDORADO—Its exclusive advantages are: Absolute freedom from Orange Rust; a very heavy bearer with great, jet black berries.

Plants are so strong and vigorous they survive severest Northern Winter without mulching.

ALFRED and ELDORADO PRICES

100 for	5.25	10.35

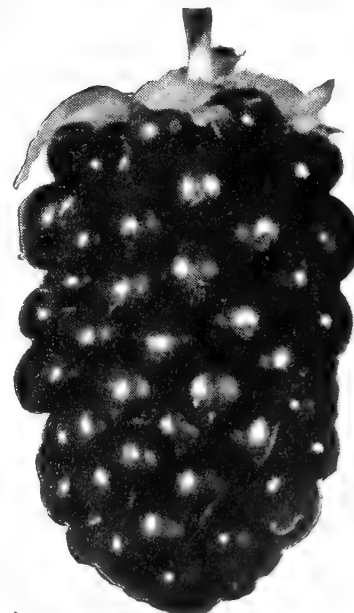

LUCRETIA DEWBERRY

Lucretia is the standard commercial dewberry. No other variety is more widely planted or more generally satisfactory. Vigorous growing, heavy bearing — especially productive on light soils that otherwise would not pay.

Dewberries are in favor because they are profitable and because they are delicious for home use. Market price averages 20 per cent more than blackberries. Ripen a week to ten days before the earliest ordinary blackberries.

Jonathan—(A) Late Fall. Sold in every store. Glossy red; fine grained, juicy flesh, excellent flavor. Medium to large size. Unusual keeper (to February) makes it a most profitable commercial apple. Quick to bear and easily grown in practically every fruit section. Jonathan is first choice in many homes.

Wealthy—Fall. Heavy yearly bearer. Hardy, long lived. Attractive, brilliant, red striped; superior quality, wine-like flavor. An all-round apple for eating, cooking, cider and market.

Northern Spy—(B) Winter. The old, well known favorite. Delicious juicy flavor; excellent for eating and cooking. Brilliant streaked red color. Always in demand; good prices; long keeper.

Baldwin—Winter. This widely known variety averages about medium size, rich dark red, juicy, fine flavor. Good for market and home use. One of the first two or three varieties in the great Michigan and New York apple sections.

Stayman's Winesap—(C) Late Winter. Best Winesap. Extra large, bright red, crisp, juicy with a wonderful zestful flavor. Stayman easily leads all other Winesaps. Heavy bearers and big money-makers everywhere.

Red Astrachan—Best Early Summer. Well known old sort. Large round, crimson apple; rich juicy, excellent eating and cooking early apple, vigorous and productive tree.

Yellow Delicious—(D) Late Fall. This beautiful apple has the distinctive shape and big size of Red Delicious with an added deliciousness and mildness of flavor that is unsurpassed by any apple. Flesh solid, crisp and full of juice; its rich golden-yellow, firm smooth skin gives it a luscious appearance. This highest quality apple is always in demand and brings top prices.

Red Delicious—(E) Double Red. Winter. Known world over. Brilliant dark red, shading to yellow at blossom end. Large to very large; white tender juicy flesh. Wonderfully rich sub-acid flavor—truly delicious. Ships without bruising, makes a wonderful appearance, commanding top prices. Comes into bearing early.

Cortland—Winter. Many customers have asked us for this newer apple and we are glad to supply them. Cortland is an excellent, early bearing, long keeping McIntosh type. Large fruit streaked with bright red and yellow. One of the best commercial sorts.

Last a Lifetime

Anoka—Have Apples the Second Year. Bears on one year old growth and bears annually. Ripens in August; very heavy bearer; fruit red stripes over yellow; fine cooking quality, short keeper. Does best in central and northern sections. **Priced Page 22.**

McIntosh—Winter. A Money-maker Today. Juicy snow apple—white, crisp flesh; beautiful solid crimson color. Excellent quality—winelike, true apple flavor. Good annual bearer. Rapidly increasing popularity among consumers everywhere makes good prices certain. One of the most profitable apples. **Priced Page 22.**

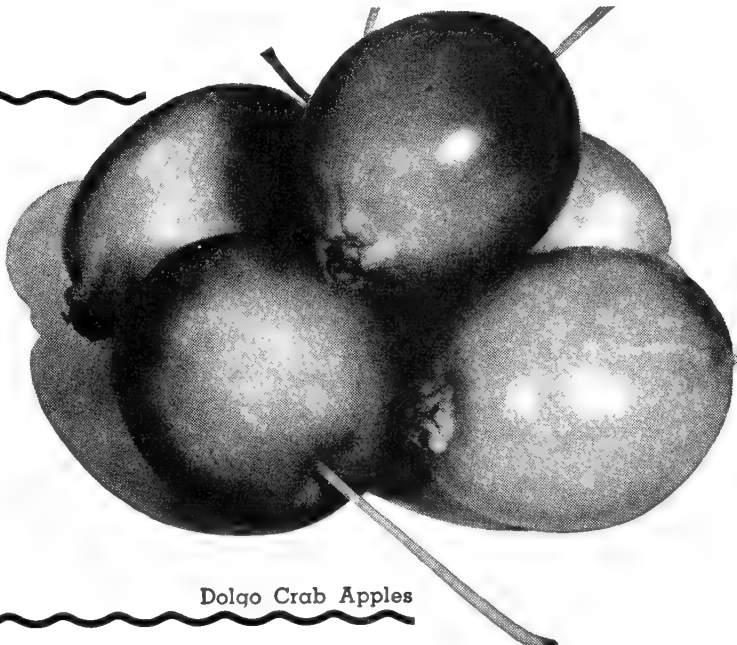

Yellow Transparent—Early Fall. Has proven both popular and profitable. Fruit large yellow with crisp sub-acid flavor. Heavy annual bearer; well known everywhere. **Priced Page 22.**

Grimes Golden— WINTER. Favorite mild eating apple. Excellent keeper, uniform shape, typical dull gold color. Hardy productive tree. Carefully selected and grafted trees insure satisfaction with this fine apple. **Priced Page 22.**

Rome Beauty— LATE WINTER. Excellent home use and baking apple. Deep red color over yellow—a handsome apple. Thick, firm skin stands handling remarkably well, makes it one of the best late winter keepers. A leading Ohio commercial variety. Tree bears very young. **Priced Page 22.**

Most Popular

HALE HAVEN

Mid-August

Wonderful new peach with great size and beautiful color of J. H. Hale and earliness of South Haven. A better peach of richest flavor; yellow flesh firm and juicy. Better shipper than South Haven; always freestone; bears every year. Hale Haven is one of the best and its sale shows a far greater increase than any other kind. Always brings more money. Ripens 15 to 20 days before Elberta and is second only to that grand variety in popularity and profits.

Hale Haven

ELBERTA

Sept. 1

Planted by Thousands

Standard commercial peach. Plant Elberta and be sure of a crop. Large to extra large. Freestone. Golden flesh, red at the pit, firm, juicy. Has no equal as a prolific bearer and shipper. Best known peach.

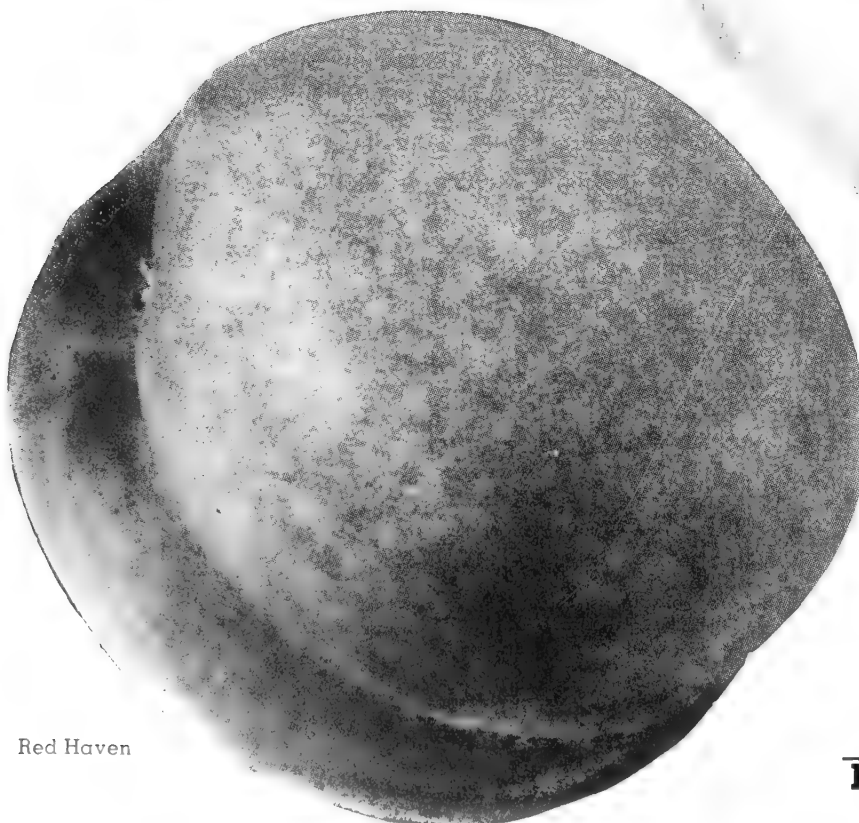

Elberta

RED HAVEN

Ripens 30 Days Before Elberta

This new Michigan Expt. Station peach is another most profitable early commercial variety. Outstanding in shipping qualities—it is of good size, red color, firmness, dependable crops. Its size, fine sweet flavor, yellow fine-grained flesh and freestone pit make it equally excellent for home use.

Redhaven is usually completely covered with brilliant red. Very heavy producers—thinning often needed. Fruit buds harder than Elberta. You should have Redhaven for a fine extra early peach.

Red Haven

NEW PEACH - FAIRHAVEN

See full description on page 2.

Peach Varieties

GOLDEN JUBILEE

Early August

Large, very attractive, orange-yellow fruits, with pink cheeks; always freestone; Elberta type but milder in flavor. Popular for home canning. Its size, color and quality bring high prices on local markets.

BIG LATE RED

Mid-September

Ripens about 10 days after Elberta. Fruit is large, bright colored, rich flavored, golden yellow with deep red blush. Freestone, firm and a good shipper. Tree is hardy, a good pollenizer and a heavy bearer.

ALL FOR \$317

GOLD DROP

Very Late — September 20th

This is an old favorite canning peach with a great many housewives because its flavor is so mild, rich and delicious—not a bit tart or bitter. Medium sized fruit with clear yellow skin and flesh, firm and not too juicy. Fully freestone. Healthy, very heavy bearing tree.

J. H. HALE

Late August

First in Size, Color, Quality

Yellow, thick skin, colors to a rosy tint. Deep yellow, fine grained very firm flesh—delicious flavor. A beautiful peach, fresh or canned. In size, color and quality, no peach compares with Hale. Always brings \$1.00 to \$1.50 more per bushel.

WHITE HALE

Large—Delicious—Freestone

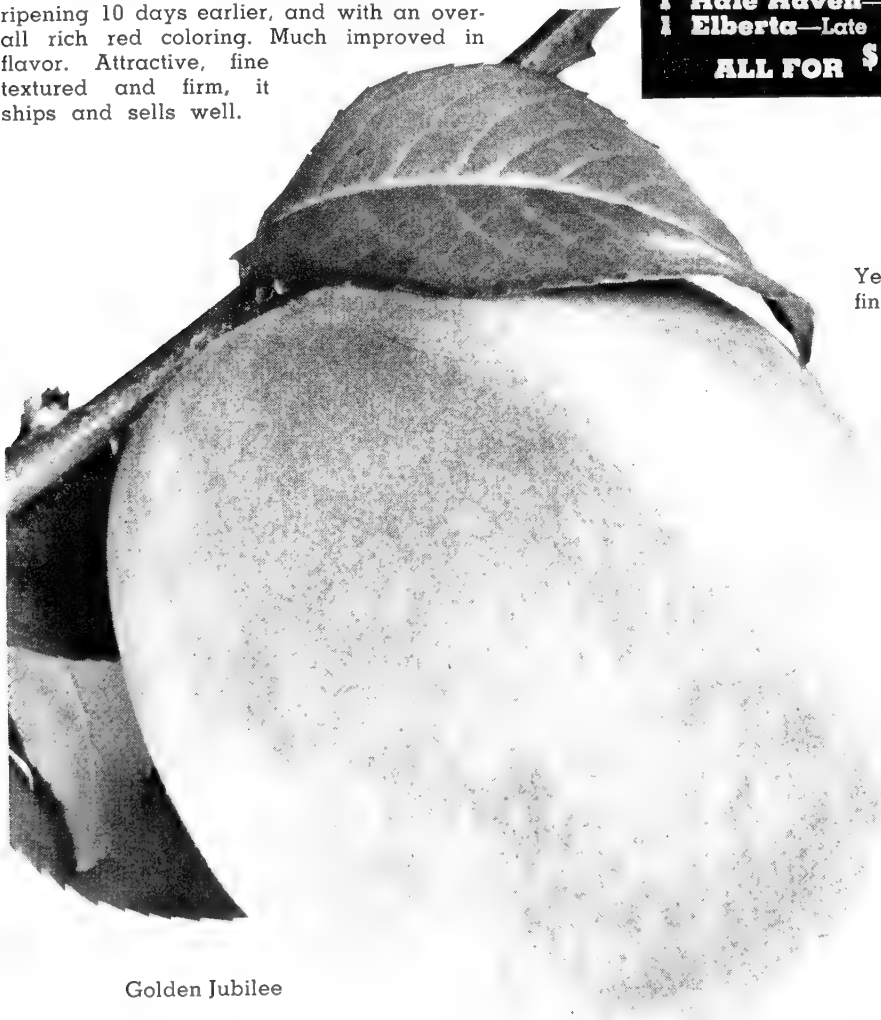

Immense size of fruit together with extreme winter hardiness and high quality make White Hale a superior white peach. Produces crops every year often in spite of frosts. "Honey sweet" describes its flavor. Fruit is juicy and freestone. Well adapted for profitable roadside trade or nearby market.

Price: \$1.25 each; 3 for \$3.45;
10 for \$10.95.

PERFECT HALE

Mid-September

A perfect flowering new variety of the Elberta type but larger, rounder and has the distinctive Hale flavor. More highly colored than Elberta, yellow flesh, freestone. Perfect Hale ripens just after Elberta to continue the picking season. With very firm big fruit, sure crops and unusually hardy tree it can be depended on to make money every year.

Golden Jubilee

DeLuxe Pear Trees

Bartlett—SUMMER. Known for quality.

One of the best known and popular varieties for both commercial and home orchard planting. Golden color with red streak, mellow and indescribably delicious both fresh and canned. Heavy bearer.

Kieffer— FALL. Best pear for large commercial planting, because of its sure crop, heavy yield and excellent shipping qualities. Kieffer has been proven unexcelled for commercial canning. A local can- nery used over 200,000 bushels in one season.

Douglas— Bears In 2 Years. Why wait 5 or 6 years for a crop of pears when the NEW DOUG- LAS very often bears the second year? Young trees have been known to bear in the nursery row. Heavy bearer of good quality fruit. Very hardy, producing fruit from a second set of blossoms, when the first was frozen. Very blight resistant. Juicy, sweet, delicious.

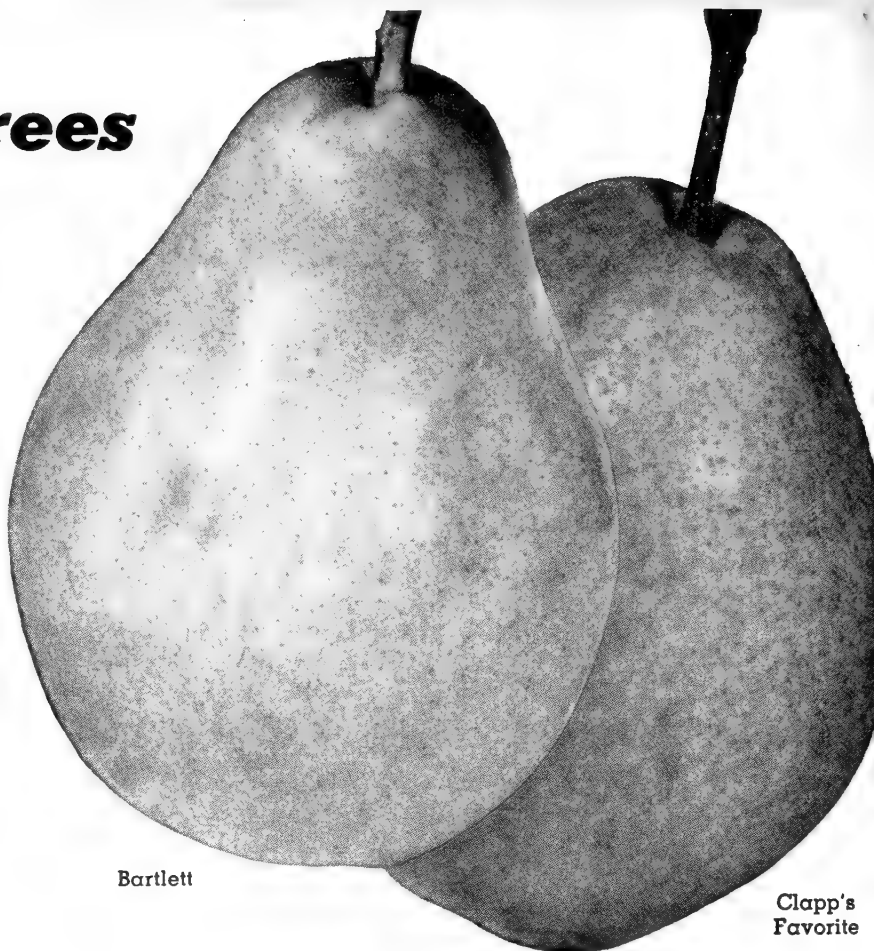

Seckel—The old favorite "Sugar Pear".

EARLY FALL. Always in market demand and equally valuable for home use. Medium sized pear; ripens late September. Delicious flavor and quality— sweet as candy. Every garden should have a Seckel.

Clapp's Favorite—SUMMER. Ripens 7 to 10 days before Bartlett and like that famous pear, is of excellent flavor, large size and fine quality, for home use. Red blush over yellowish-green skin; good shipper; early high prices. Vigorous, productive tree.

Bosc—LATE FALL. The ideal long-keeping pear. Fruit beautiful golden russet, very large size. Flesh is white, juicy and a delicious, delicate pear flavor—a real winter time treat. Tree is vigorous and hardy.

Seedless Pear—Think of eating right through a deli- cious pear! Practically without seeds or core when planted alone (planted near other pears, cross pollination may produce some seeds). Ripens 10 days after Bartlett. Fine color, good size and flavor. Especially favored for dessert and canning uses. Begins bearing in 3 years.

Select Cherry Trees

Montmorency
Cherry

Montmorency—Sour. Known and grown everywhere. Ripens late in June and is best sour cherry for market. Makes delicious pies; fine for canning. Fruit larger than Richmond; bright red, acid flavor. **Grow Montmorency for the Canning Market.**

Early Richmond—Sour. One of the most popular sour cherries, unexcelled for cooking. Dark red, tart, and juicy. Hardy trees uninjured by cold. Big crops.

Black Tartarian—Sweet. Best known black sweet. Extensively planted and prolific. Regular bearer of big, black juicy, sweet fruit. Hardy, vigorous. Best and most profitable black sweet cherry—for market and home.

Schmidt's Bigarreau—Sweet. Newer sort. Unusually hardy. One of the best late sorts, especially in Northern sections. Largest size, firm fruit; deep red to mahogany. Brings best prices.

Quince

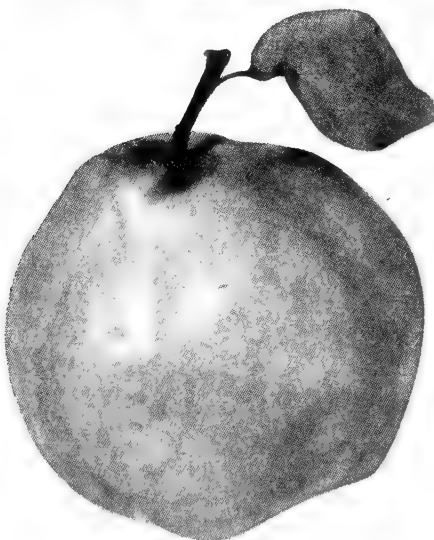

ORANGE—Best of All Quince. Regular annual bearer of fine, large, rich yellow, aromatic fruit. Makes delicious jam and quince "honey". Trees hardy in most all sections. Begin bearing very young and produce large crops.

Price: 1 yr. 7/16 in., 3-4 ft., Each \$1.65; 2 for \$2.95.

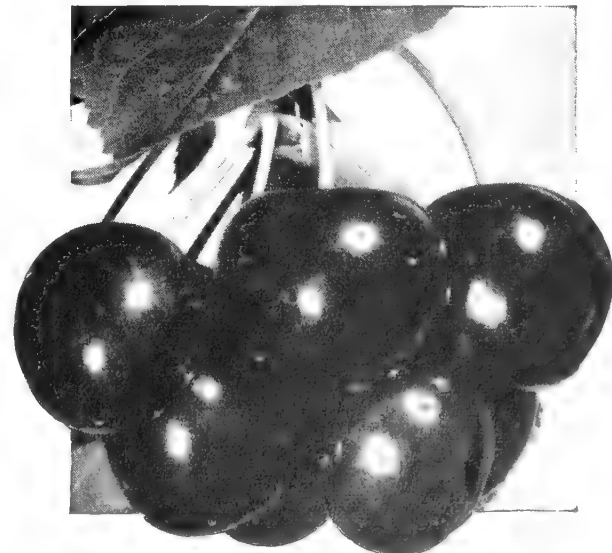

Hansen Bush Cherry

(See Page 30)

Fruit as delicious as sweet cherries; makes excellent Jell and Jam.

August Supreme

Finest Hardy Plums

Stanley Prune— Recommended by New York Expt. Station as the best new early plum—early August, 10 days before German Prune. Stanley is the finest prune type plum; fruit largest size, dark bluish purple, freestone, fine grained, tender, juicy and sweet. Firm and does not crack. Excellent quality for cooking or eating. Produces heavy full crop every year; often bears in 3 years.

Italian Prune— Best for Canning and Preserving. Medium size dark purple plum. Firm, sweet, the favorite everywhere for canning. Tree easy to grow, remarkably free from disease, very productive. Good keeper, excellent shipper. Ripens in September.

Yellow Egg— Best Yellow Plum. Extra large fruit. Clear yellow egg shaped. Sugar-sweet, rich, juicy and melting. Fine for table or canning use. Hardy productive tree. Ripens August.

Green Gage— This Round, Greenish-Yellow plum has about the sweetest flavor of all. Every housewife wants Green Gage for canning and preserving. Medium size, full of juice, unusually heavy bearer. Always sells well. Late September.

Burbank— Delicious Table Plum. Hardy Japanese variety free from black knot. Deep red color, unusually delicious flavor. Keeps three weeks after ripening. Ripens August 15 to Sept. 1.

Monarch—The Favorite Purple Plum—Medium to large, round fruit; juicy golden yellow flesh. The tree is hardy, bears early. Always sells well on the market and is excellent for eating and canning.

Blue Damson— This is the little, blue, solid plum that is so highly prized by every housewife as the finest plum for preserving. Exceptionally vigorous, hardy and disease-free tree bears enormous crops that do not get overripe or drop. Wonderful shipper. Always in demand at top prices. Shropshire Damson — the best quality, heavy yielding strain.

Perfection
Apricot

Apricots

Apricots are quite hardy—about like standard plums. Two or more trees should be planted to provide full pollination.

PERFECTION—This new golden-yellow apricot is the finest variety today. Its size is about like a medium peach and ripens evenly. Flavor is delicate and delicious, melting in sweetness when picked fully ripe from the tree. Tree is unusually hardy, vigorous, productive. It is well named — "Perfection".

Chinese Chestnut

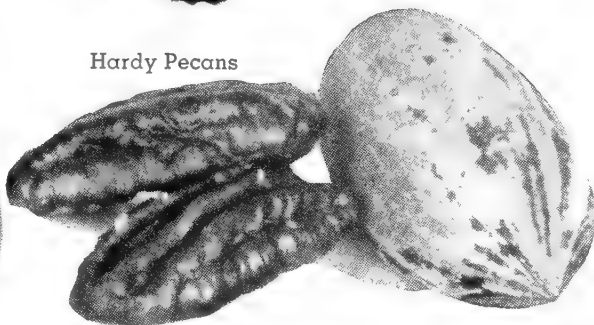

CHINESE CHESTNUT

This blight resistant Chestnut makes it possible to again grow these delicious nuts everywhere. The nuts, borne 3 to 5 in each bur, are large, full flavored, delicious. A feature of Chinese Chestnut is its rapid growth and early bearing—trees often bearing in the nursery. Well grown, 3 yr., 2 to 3 ft. trees—**\$1.95** each; 2 for **\$3.35**.

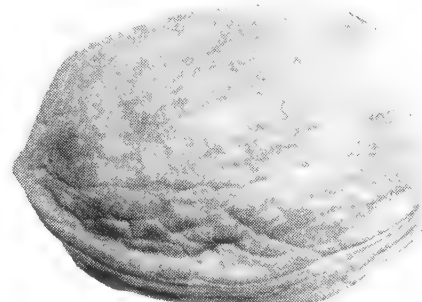

Thomas Black Walnut

Hardy Pecans

English Walnut

AMERICAN FILBERT (Hazel Nut)—The familiar, sweet nut in nursery grown stock much improved for nut size and quick growth. Use it as an ornamental shrub (grows to 5 to 7 feet) and have a big nut crop too. 2 year, 2 to 3 foot trees—**95c** each; 2 for **\$1.75**.

THOMAS BLACK WALNUT—A greatly improved black walnut. Bears heavy crops of unusually large nuts that are especially thin shelled and easy to crack. Deliciously flavored kernels, easy to get out. Tree is hardy and often bears second or third year after planting. 2 year, 2 to 3 foot grafted trees—**\$2.25** each; 2 for **\$3.95**.

Hardy Nut Trees

Beautiful for Shade – Profitable for Crops

Nut trees are low in cost, easy to grow and make beautiful shade trees. Why not grow those nuts you know and enjoy so much?

HARDY PECAN—Pecans are the general favorite. With this hardy variety they can now be grown in the North. Good size, fine flavored, easy to crack and use. Tree is a hardy, rapid grower. Good rooted, 2 year, 2 to 3 ft. trees—**\$1.45** each; 2 for **\$2.50**.

AMERICAN BLACK WALNUT—The typically American nut—favored in every home. Always a dependable bearer of large, well-filled, rich flavored nuts. Sturdy 2 yr., 2 to 3 ft. trees—**60c** each; 2 for **\$1.00**.

HARDY ENGLISH WALNUT—Now you can grow this favorite Christmas-time nut in more northern locations. These Hardy English Walnuts grow successfully from Canada through the middle west. The tree is different, unusual and a good shade tree. Nuts are large, thin shelled, well filled, delicious. Sturdy 2 yr., 2 to 3 ft. trees—**\$2.25** each; 2 for **\$3.95**.

Giant Cultivated Blueberries

Genuine cultivated Blueberries produce big yields of giant size, deliciously sweet berries, three to four times the size of wild kinds. Now every garden can have enough of this healthful fruit for canning and pies. Plant 2 to 6 bushes. Last a lifetime and yields vary from 3 to 9 quarts per bush depending on age.

RANCOCAS. Early. Hardy, vigorous, productive; very large, firm berries of excellent sweet flavor.

STANLEY. Midseason to Late. Sweet and delicious blueberry flavor. One of the finest and largest. Heavy crops of big, bluetinted berries borne in clusters. Unusually upright, vigorous, well-shaped bush. Stanley is a newer, most satisfactory sort.

JERSEY. Late. Largest of 10 leading kinds, of fine appearance and average yield. Jersey is one of the best cultivated blueberries. Strong sturdy bushes.

RUBEL. Very late. Hardy, vigorous and very productive, upright grower; large, extra firm berries of good quality. Recommended for commercial use.

(Write for prices on large quantities)

Satisfactorily grown on sandy or muck soil strongly acid and well supplied with water. Soil not acid can be made so by mixing in acid peat, rotted leaves, or humus. Plant 5 to 7 feet apart.

French
Lilacs

Plant World's Best Gorgeous French Lilacs

French Hybrids are something unusual in lilacs. Very fragrant, the clusters are covered with single and double flowerlets, making panicles 8 to 10 inches long. Budded bushes that do not spread from the roots as the old fashioned lilacs do. Use in single plantings, groups or hedges; height is 6 to 8 ft.; plant 5 ft. apart. Usually blooms next year after planting.

Your choice of Purple, Red or White—please state color you want. Strong, 2 yr. 18-24 in. plants. Each 95c; 3 for \$2.75.

Pink Weeping Wisteria

This pink wisteria is pleasantly different from the usual purple flowering vine and it usually begins blooming in two to three years after planting. A most hardy, vigorous grower to cover arbors, trellises, porches. Covered with a profusion of gracefully hanging pink flowers during the summer.

2 yr. No. 1 plants, grown from blooming wood—Each 95c; 2 for \$2.75.

Hansen's Bush Cherry

The fruit of this fine ornamental shrub is good to eat. Fruits are large as the average cherry; have a new, delicious flavor; excellent fresh and for jam and jell. White flowers in spring, red and gold foliage in autumn. Hardy everywhere, grows to about 4 to 5 ft.; bears immense crops annually.

PRICE: 2 yr. 18-24 inch—Each 45c; 3 for \$1.25; 6 for \$2.25.

3 yr., Bearing Size — Each 65c; 3 for \$1.80; 6 for \$3.15.

Clematis Jackmani

Intense violet-purple, velvety flowers; many 4 to 6 inches across. Blooms from July to frost and the whole vine is often a mass of striking color. Hardy everywhere and one of the most colorful vines anywhere.

Strong, 2 yr. No. 1 plants—Each 85c; 3 for \$2.40.

Clematis Jackmani

Pink Wisteria

Hansen Bush Cherry

Gold Flame HONEYSUCKLE

Blooms all summer. A new brilliant, large flowering honeysuckle vine that is hardy anywhere. Trumpet flowers are rose-red, with throats tinted golden; borne in masses over the vine and very fragrant.

Strong, 2 yr. No. 1 plants—Each 70c; 3 for \$1.95.

Silver Lace Vine

In the late summer and fall this unusual and beautiful vine is covered with a cloud of misty white—tiny white flowers with touches of yellow and rose. Often grows 25 feet in one season. Hardy vine for covering arbors, fences, lattices, etc.

Strong, 2 yr. No. 1 plants—Each 70c; 3 for \$1.95.

All shrubs on this page are not only 2 years old but are 1½ to 2 ft. high. All field grown, heavy, well rooted and branched. They will make a good growth and a fine showing quickly.

BEAUTY BUSH—(*kolkwitzia amabilis*) Famed for its beauty. Covered early in May with a profusion of small, bell-shaped, clear pink blossoms, marked with brownish spots and veins. A tall growing, graceful, hardy bush. **Price**—Each 70c; 3 for \$1.85.

Beauty Bush

FRENCH PUSSY WILLOW—In early spring this tall compact shrub with its long, silky grey catkins covering the branches before the leaves start, is always a welcome sight. Cut its stems for bouquets just as the snow is leaving. **Price**—45c each; 3 for \$1.25.

PINK FLOWERING ALMOND—Upright grower, 3 to 4 ft. Long branches are thickly studded with small double, delicate pink flowers over their full length, before the leaves appear. Blooms in April. **Price**—Each 68c; 3 for \$1.85.

FORSYTHIA INTERMEDIA—**Golden Bell.** Earliest shrub to bloom. Bright yellow flowers seem the spirit of Spring, opening before the leaves appear. Grows to 6 to 8 ft. but may be pruned as desired. Branches slightly drooping. Dark green leaves. **Price**—Each 48c; 3 for \$1.30.

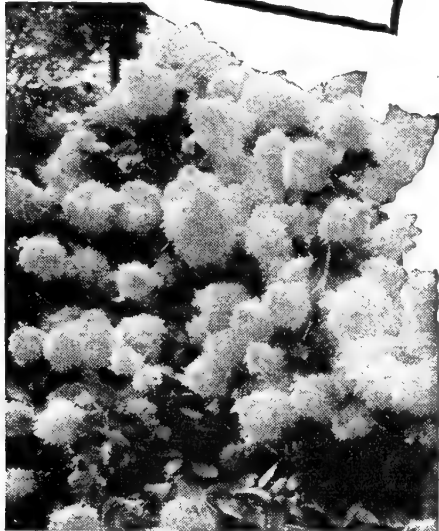

HYDRANGEA P. G.—This showy shrub is perfectly hardy. Large clusters of pure white blossoms, later turning soft pink, from August to late Fall. Superb either singly or in groups; often used as a hedge. **Price**—Each 58c; 3 for \$1.60.

SCARLET FLOWERING QUINCE—Scarlet flowers in April and May. Grows 6 to 8 ft. One of the most attractive spring blooming shrubs; blossoms always large, flowering in great masses just as the leaves are coming out. Foliage a dark glossy green. **Price**—Each 48c; 3 for \$1.30.

MOCK ORANGE VIRGINALIS—A magnificent new variety. Medium height, compact bush. The flowers (single, semi-double and fully double) are the largest and most sweetly fragrant of any variety, with longest early blooming season. **Price**—Each 58c; 3 for \$1.60.

SPIREA VAN HOUTTEI — **Bridal Wreath.** One of the most beautiful and popular of flowering shrubs. In May and June the slender branches droop and form a veritable fountain of snowy white bloom. Thrives anywhere, in shade or sun, wet or dry; grows to 6 to 8 ft. A beautiful ornamental hedge. **Price**—Each 25c; 3 for 65c; 6 for \$1.20; 12 for \$2.00; 25 for \$3.75.

WEIGELA EVA RATHKE—**Crimson.** 3½-4 ft. June flowering. Of smaller growth than the other Weigelas; decidedly spreading. A profusion of flowers brilliant crimson with white throats is its outstanding characteristic. It is especially showy. **Price**—Each 58c; 3 for \$1.60.

The 10 Most Popular **TEA ROSES**

PRICE:- All Roses on This Page
Strong 2 Yr. Field-Grown Bushes
Each 80c 3 for \$2.25

Picture—A newer rose beauty. Velvety, warm pink with undertones of salmon. Large flowering continuous bloomer. Truly a picture in any garden.

K. A. Victoria—Snow white, double blooms with faint lemon tint in the center. Very fragrant. An old favorite and still one of the best.

Golden Dawn—Unusual rich golden yellow rose with petal edges tinged crimson. Long buds; full flowers richly fragrant.

Grenoble—Unusually long stemmed rose—fine for cutting. Rich scarlet-crimson blooms. A favorite red rose.

The Doctor—An outstanding pink rose whose exquisite silvery-pink coloring is unmatched by any other. Large buds opening to a gorgeous flower.

Condesa de Sastago—Deep coppery-pink inside, golden-yellow outside. Large double open flowers. A striking rose. Tall vigorous bush.

Poinsettia—Brilliant Red. A newer red rose not yet generally offered. True, brilliant red, full flowering rose. Strong growing, vigorous bush. A fine, fragrant, rose-red rose.

Mrs. P. S. Dupont—Deep golden-yellow, semi-double, fragrant. Dependable for blooms all summer. Quantity of flowers on a sturdy bush.

Christopher Stone—A new brilliant scarlet-crimson, large size, rose. Unusual Damask fragrance. Free-blooming bush that stands hot weather well. One of the best.

Talisman—This strikingly colored rose is a favorite with every rose grower. Long pointed orange and copper-red buds open to double, high centered, rose-red and copper blooms. Finest for cutting with long stems and rich fragrance. Bush is free flowering and hardy.

"FESTIVAL" **A ROSE WITHOUT THORNS**

Bush "Festival" (Plant Pat. No. 545)—Think what it will mean to cut roses without worrying about thorns in your hands or clothes. Trimming and training bushes without thorns is a pleasure. You will enjoy growing this new rose—"Festival."

Bush "Festival's" scarlet, large, very double blooms make a grand display in every garden and are ideally long lasting when cut for bouquets. It is a hardy, hybrid tea, growing a vigorous free flowering bush. Blooms all summer from June to freezing weather.

Climbing "Festival" (Plant Pat. No. 687)—Climbing "Festival" produces the same fine flowers in masses on its climbing—and thornless—branches. Flowers heavily in June with occasional blooms during the summer.

"Festival's" freedom from thorns is well worth its patent and its fine blooms and sturdy bush are exceptional. It is a pleasure to be able to make this new rose available to our customers. Be sure to tell us whether you want the bush or climber.
